Education and Social Change in China: Inequality in a Market Economy Gerard A. Multiculturalism and Intergroup Relations Fathali M. Moghaddam, 2008 Part of PsycBOOKS collection *Multiculturalism* Christine Inglis, 1996 **China's Ethnic Minorities** Rongxing Guo, 2013-04-26 The majority of China's population is the Han. Till now China has officially identified except for other unknown ethnic groups and foreigners with Chinese citizenship 55 ethnic minorities. Ethnic minorities vary widely in size in China. With a population of more than 15 million the Zhuang have been the largest minority group and the Lhoba with only 2 thousand or more the smallest. China's ethnic diversity has resulted in a special socioeconomic landscape of China itself. The book sets out to collect and estimate a full set of data on the socioeconomic situations of China's ethnic minorities. Till present a complete socioeconomic picture of China's ethnic groups still remains unclear from China's official sources. How different have been China's ethnic minorities in every sphere of daily life and economic development during China's fast transition period. In order to answer these questions we need a detailed and comparable set of data for each of China's ethnic minorities. This book provides in an easy to use format a broad collection of data on China's 55 ethnic minorities. It is a resource book that profiles the demography, employment and wages, people's livelihood, agriculture, industry, education, science and technology and culture, sports and public health for each of these ethnic minorities. These indicators estimated on the author based on materials gathered from a variety of sources and clearly presented in one volume will be of great value to researchers, businesses, government agencies and news media.

Department of Policy planning (Beijing).,2005 **Multiculturalism and the State** ,1994 *Wto Accession and Socio-Economic Development in China* Parikshit Basu,Yapa Bandara,2009-06-15 This book reviews how China's accession to the WTO has impacted upon its education environment economic and social outcomes in recent years It has been argued that China's rapid growth in output and exports and subsequent accession to WTO has significantly increased income and therefore the well being of the Chinese population However doubts are now being raised that higher income is generated at the cost of deteriorating environmental and social standards which has increasingly affected the health of the Chinese people especially those who live in major industrial cities Also there is a widespread perception that its accession to WTO has significantly increased social shocks especially among the farming community and contributed to poor health outcomes among the rural population These issues are critically analysed in this book by experienced academics from China and Australia Includes contributions from Australian and Chinese scholars and thus brings together ideas and suggestions from a broad range of perspectives Analyses China's socio economic challenges from a multi dimensional focus A very useful reference in WTO issues in general and China in particular **Immigration and Multiculturalism** James Jupp,1999
