Salvatore Mancuso, 2021-04-27 This book reconsiders the use of food metaphors and the relationship between law and food in an interdisciplinary perspective to examine how food related topics can be used to describe or identify rules norms or prescriptions of all kinds The links between law and food are as old as the concept of law Many authors have been using such links in creative ways to express specific features of law This is because the language of food and cooking offers legal thinkers and teachers mouth watering metaphors comparing rules to recipes and their combination to culinary processes This collection focuses on this relationship between law and food and takes us far beyond their mere interaction to explore different ways of using these two apparently so diverse elements to describe different phenomena of the legal reality The authors use the link between food and law to describe different aspects of the legal landscape in different areas and jurisdictions Bringing together metaphors and indirect correlations between law and food the book explores different models of approaching legal issues and considering different legal challenges from a completely new perspective in line with the multidisciplinary approach that leads comparative legal studies today and to a certain extent revisiting and enriching it With contributions in English and French the book will be of interest to academics and researchers working in the areas of law and food law and language and comparative legal studies *LIVESTOCK PRODUCTION MANAGEMENT* Ghosh, Nilotpal, 2019-07-01 Written as per the Fifth Deans Committee Report of ICAR the book meticulously describes in a nutshell the basic and applied aspects of Livestock Production Management in Indian context The book primarily covers all important information about farm animals like cattle buffalo sheep goat and pig and poultry their breeds reproduction and breeding feeds and feeding housing requirement care and management and health control measures KEY FEATURES It is written in a simple and lucid language for easy grasping The text is supported with numerous examples tables photographs and diagrams for clear understanding of the concepts A large number of objective as well as subjective questions given at the end of each chapter is an added attraction of the book which will be of help to the concerned students for their internal short tests and final examination It will also help the concerned teachers in teaching this course in a time bound schedule Answers to objective questions are provided at the end of each chapter for students self assessment The information is up to date and given in concise form in such a manner that the book can be used as a substitute of class notes TARGET AUDIENCE B Sc Hons Agriculture B Tech Dairy Technology B V Sc A H Broiler World, 1956 Good Practices in Planning and Management of Integrated Commercial Poultry Production in South Asia R.
