Slah Msahli, Faten Debbabi, 2022-08-22 This book presents the proceedings of CIRATM 9. The papers present the latest scientific concepts and technological developments in textile and materials of worldwide researchers and practitioners. The conference promotes sharing ideas and emerging technologies and fosters research and development collaborations amongst academia, research institutions, and relevant industries. CIRATM is the first international conference applied on textiles in Tunisia and all Maghreb. It is a regular conference organized every two years since 2004. It focuses on all textile and materials fields. It joins together all actors of the textile field and shares research with many international collaborators. This edition is organized with the collaboration of 4 Tunisian partners and 6 international associates and institutions: Laboratory of Textile Engineering LGTex Tunisia, Monastir University Tunisia, Tunisian Association of Textile Researchers ATCTex Tunisia, Le p le de comp titivit Monastir El Fejja mfcpole Tunisia, Association of the universities for textiles AUTEX International, Balkan Society of textile engineering BASTE, National research development institute for textile and leather INCDTP Bucharest Romania, Yazid University Iran, Centre d Essais Textile Cetelor Lorraine France, Center of Textile Science and Technology 2C2T University of Minho Portugal.

Simulation in Textile Technology Dieter Veit, 2012. The use of mathematical modelling and computer simulation can vastly improve the quality, efficiency, and economic success of textile technology. Simulation in textile technology provides a comprehensive review of the key principles, applications, and benefits of modelling for textile production. After an introduction to modelling and simulation, Simulation in textile technology goes on to review the principles and applications of the main types of model. The book first discusses neural networks and their applications before going on to explore evolutionary methods and fuzzy logic. It then considers computational fluid dynamics and finite element modelling. The modelling of fibrous structures and yarns are considered in the following chapters, along with wound packages, woven, braided, and knitted structures. The book concludes by reviewing the simulation of textile processes and machinery. With its distinguished editor and team of expert contributors, Simulation in textile technology is a valuable reference tool for all those involved in both developing models of textile processes and those applying them to improve process efficiency and product quality. Provides a comprehensive review of the key principles, applications, and benefits of modelling for textile production. Discusses neural networks and their applications before going on to explore evolutionary methods and fuzzy logic. Considers the modelling of fibrous structures and yarns along with wound packages, woven, braided, and knitted structures.

JTN., 1991 **Ancient Textile Production from an Interdisciplinary Perspective** Agata Ulanowska, Karina Grömer, Ina Vanden Berghe, Magdalena Öhrman, 2022-04-29. The diverse developments in textile research of the last decade, along with the increased recognition of the importance of textile studies in adjacent fields, now merit a dedicated full-length publication entitled Ancient Textile Production from an Interdisciplinary Perspective. Humanities and Natural Sciences Interwoven for our Understanding of Textiles. With this volume, the authors and the editors wish to illustrate to the current impact of textile archaeology on the scholarly perception of the past, not limited to archaeology alone. The

volume presents new insights into the consumption meaning use and re use of textiles and dyes all of which are topics of growing importance in textile research As indicated by the title we demonstrate the continued importance of interdisciplinarity by showcasing several interwoven approaches to environmental and archaeological remains textual and iconographic sources archaeological experiments and ethnographic data from a large area covering Europe and the Mediterranean Near East Africa and Asia The chronological span is deliberately wide including materials dating from c 6th millennium BCE to c mid 14th century CE The volume is organised in four parts that aim to reflect the main areas of the textile research in 2020 After the two introductory chapters Part I About this Volume and Textile Research in 2020 follow two chapters referring to dyes and dyeing technology in which analytical and material based studies are linked to contextual sources Part II Interdisciplinarity of Colour Dye Analyses and Dyeing Technologies The six chapters of Part III Interdisciplinary Approaches to Textile Tools discuss textiles and textile production starting from the analyses of tools whether functional or as representative of technological developments or user identity Archaeological and cultural contexts as well as textile traditions are the main topics of the six chapters in Part IV Traditions and Contexts Fibres Fabrics Techniques Uses and Meanings The two final chapters in Part V Digital Tools refer to the use of digital tools in textile research presenting two different case studies
