Assessing the English Language Writing of Chinese Learners of English Liz Hamp-Lyons, Yan Jin, 2022-05-24. This book focuses on the assessment of English language writing in China mainland, the territories of Hong Kong and Macau and Taiwan. The first part of the book describes how writing in English has been assessed in Chinese contexts in the past 25 years and how it continues to be assessed at present. The second part of the book presents reports of work such as formative classroom based assessment, feedback based or feedback led approaches, learning oriented assessment, portfolios as well as the important issue of teacher professional development in writing assessment. This two part division relates to and reflects what has been happening in writing assessment internationally in the UK from the 1940s and in the US in the past 25 years. The use of English for international business communication, for international political negotiations and its rapidly increasing use as a medium of instruction in some subject areas has led to a rapid increase in the numbers of Chinese L1 speakers who are learning and being assessed in English. This is often done with an emphasis on reading and writing. The vast majority of assessments of English language writing are done through large scale direct testing that uses simple prompts, tasks and short writing samples. This book explores best practices in assessing the writing in English of native speakers of Chinese.

Assessing the English Language Writing of Chinese Learners of English edited by long time experts Liz Hamp Lyons and Yan Jin clearly demonstrates the authors collective years of writing and teaching about writing assessment. The book's 13 chapters written by recognized experts in assessment of Chinese speakers learning English represent a wide array of important topics written in reader friendly language and offering evidence for pedagogical practices as well as high stakes testing of writing. Teachers, researchers, administrators of writing programs in China and test developers who seek counsel about this population need look no further than to add *Assessing the English Language Writing of Chinese Learners of English* to their reading list.
