McDougal Littell World History: Patterns of Interaction McDougal Littell, 1998-11 **The 1848 Revolutions and European Political Thought** Douglas Moggach, Gareth Stedman Jones, 2018-02-22 The revolutions that swept across Europe in 1848 marked a turning point in the history of political and social thought They raised questions of democracy nationhood freedom and social cohesion that have remained among the key issues of modern politics and still help to define the major ideological currents liberalism socialism republicanism anarchism conservatism in which these questions continue to be debated today This collection of essays by internationally prominent historians of political thought examines the 1848 Revolutions in a pan European perspective and offers research on questions of state power nationality religion the economy poverty labour and freedom Even where the revolutionary movements failed to achieve their explicit objectives of transforming the state and social relations they set the agenda for subsequent regimes and contributed to the shaping of modern European thought and institutions **Revolution, Socialism, and Nationalism in Viet Nam: Winning the war and losing the peace** Ken Post, 1989 This final volume completes the history and analysis of the Vietnamese Revolution by bringing it up to final Communist victory in 1975 Although it deals with the relevant developments in the North it basically concentrates on the struggle in the South following the massive US intervention in 1965 Unlike other analyses it focuses primarily on the Vietnamese protagonists the Communists and the Republic of Viet Nam examining above all the questions of why the former were able to win and whether the latter could ever have been a viable regime **From Ike to Mao and Beyond** Bob Avakian, 2005 Bob Avakian has written a memoir containing three unique but interwoven stories The first tells of a white middle class kid growing up in 1950s America who goes to an integrated high school and has his world turned around the second of a young man who overcomes a near fatal disease and jumps with both feet into the heady swirl of Berkeley in the sixties and the third of a radical activist who matures into a tempered revolutionary communist leader If you think about the past or if you urgently care about the future if you want to hear a unique voice of utter realism and deep humanity and if you dare to have your assumptions challenged and your stereotypes overturned then take a look at this book From publisher description [The Irish Revolution, 1913-1923](#) Joost Augusteijn, 2017-03-14 Was there an Irish Revolution and if so what kind of revolution was it What motivated revolutionaries and those who supported them How was the war fought and ended What have been the repercussions for unionists women and modern Irish politics These questions are here addressed by leading historians of the period through both detailed assessments of specific incidents and wide ranging analysis of key themes *The Irish Revolution 1913 1923* provides the most up to date answers to and debate on the fundamental questions relating to this formative period in Irish history Clear coverage of the historiography and a detailed chronology make this book ideal for classroom use *The Irish Revolution* is essential reading for students and scholars of modern Ireland and for all those interested in the study of revolution [The October Revolution and Africa](#) , 1990

Power and the Nation in European History Len Scales, Oliver Zimmer, 2005-06-09 Few would doubt the central importance of the nation in the making and unmaking of modern political communities The long history of the nation as a concept and as a name for various sorts of imagined community likewise commands such acceptance But when did the nation first become a fundamental political factor This is a question which has been and continues to be far more sharply contested A deep rift still separates modernist perspectives which view the political nation as a phenomenon limited to modern industrialised societies from the views of scholars concerned with the pre industrial world who insist often vehemently that nations were central to pre modern political life also This book engages with these questions by drawing on the expertise of leading medieval early modern and modern historians
