Chapter 16 Halliday:

Perspectives from Systemic Functional Linguistics Akila Sellami-Baklouti, Lise Fontaine, 2018-04-09 This innovative collection brings together contributions from established and emerging scholars highlighting the applicability of Systemic Functional Linguistics and the ways in which theoretical and analytical conclusions drawn from its applications can inform and advance the study of language. The book discusses SFL's theoretical foundations and development in recent years to demonstrate its evolution into a more effective analytical tool. Building on this theoretical framework, the volume showcases the theory's applications in case studies exploring four sub-disciplines of language study: multilingual studies, translation studies, language learning and language teaching, and genre analysis. This all-inclusive volume demonstrates both Systemic Functional Linguistics' efficacy as a means of theoretical analysis but also its value as a unique approach to the study of language and meaning, making this an indispensable resource for researchers and scholars in applied linguistics, discourse analysis, genre studies, translation studies, and multilingualism.

Metaphor and Cognition Zhuanglin Hu, 2023-11-03 This book collects virtually all research perspectives on metaphor in the field of cognitive linguistics. Moreover, it presents a comprehensive range of research methods for metaphor, including qualitative and quantitative methods and the combination of the two. For example, critical metaphor analysis, metaphor interpretation, metaphor experiments, neuro method, and so on are all explained in detail.

Summary of Thomas Halliday's Otherlands Everest Media, 2022-03-22T22:59:00Z Please note This is a companion version, not the original book. Sample Book Insights: 1 The Alaskan horses are close to the size of ponies and their coats are shaggy and dun. They are the truest inhabitants of the arid north and they remain no matter the conditions. Their life expectancy is 15 years. 2 The American lion, the largest of the three, is descended from ancestors that moved across from Eurasia about 340,000 years ago. The African lion is the daintiest. They are both large cats and they hunt the same prey: horses and caribou. 3 Ecosystems are built piecemeal. The aggregations of species that produce a sense of place also provide a sense of time. A community is a temporary association of living things that depends on evolutionary history, climate, geography, and chance. 4 The first Americans were small communities of eastern Beringian humans who thrived in the low plains of Beringia. As the climate changed and humans gained an ever deeper foothold in the continent, many of the native species died out.

Linguistic Descriptions of the Greek New Testament Stanley E. Porter, 2023-08-10 Stanley E. Porter provides descriptions of various important topics in Greek linguistics from a Systemic Functional Linguistics (SFL) perspective, an approach that has been foundational to Porter's long and influential career in the field of New Testament Greek. Deep insights into Porter's understanding of SFL are displayed throughout, based either upon how he positions SFL in relation to other linguistic models or how he utilizes it to describe topics within Greek and New Testament studies. Porter reflects on his core approach to the Greek New Testament by exploring subjects such as metaphor, rhetoric, cognition, orality, and textuality.

as well as studies on linguistic schools of thought and traditional grammar
