Application Manual Power Modules Peter R. W. Martin, 2000 **Facility Simulation Model for Advanced BMD Systems. Volume IVA. Power Module: User's Manual** A. Kao, R. Blackmon, D. Eng, E. McDowell, ARMY CONSTRUCTION ENGINEERING RESEARCH LAB CHAMPAIGN ILL., 1975 This Power Module Volume is divided into a user's manual, a program reference manual, and a program listing. In this user's manual, input formats are outlined for each power system: diesel engine, gas turbine engine, turbo alternator, fuel cells, and batteries. The module calculates the performance characteristics of each system and also selects commercially available power systems from a data base for both diesel and gas turbine to meet the power output requirements. Five sample problems, one for each power system, illustrate the use of the Power Module.

This operator's manual provides operating procedures, troubleshooting, PMCS, maintenance, and supporting information required to operate and maintain the AMMPS 5 kW generator sets. Listed below are some of the features included in this TM to help locate and use the provided information. This TM has been organized using the Work Package (WP) concept. Each chapter contains a series of WPs rather than sections and paragraphs. Each WP is designed to stand alone as a complete information module. If you keep the sections of this TM in a loose leaf binder, you will be able to remove just the WP needed to complete a specific task. Each WP is numbered using a four-digit number beginning with WP 0001. WPs are numbered sequentially throughout the TM, e.g., WP 0022, WP 0023, etc. The Table of Contents lists each chapter and WP title, as well as all figures and tables contained within each WP. Figures and tables are numbered sequentially within each WP. The WP number is located at the top right of each page. It is also located at the bottom of the page with the WP page number included. 0001 1 would be page 1 of the General Information WP. WP 0001 General Information. Each WP starts on a right-hand page. This is done so you can remove a single WP from the paper TM if needed for a task. Blank pages are assigned a number but it appears on the preceding or following page. For example, if page 0001 10 of a WP is blank, page 0001 9 will have the number 0001 9 10 blank, or if page 0001 1 of a WP is blank, page 0001 2 will have the number 0001 1 blank 2. Each WP containing step-by-step maintenance or troubleshooting procedures will end with the words END OF TASK, and each WP ends with the statement END OF WORK PACKAGE. Think of each WP as a small standalone TM.
