

XBOX 360 Light Codes

The XBOX 360 video game console has a 'Ring of Light', a circle of 4 bi-color LEDs, with a green LED in the center. This is used to indicate what state the console is in, and allows the user to diagnose faults with the console. Each of the LED 'quadrants' has a number: 1 is upper left, 2 is upper right, 3 is lower left, and 4 is lower right. The position of the numbered quadrants stays the same whether the console is placed horizontally or vertically.

Powered On

The power LED is illuminated green when the console is switched on and operating normally. The number of quadrants lit indicates how many controllers are connected.

Hardware Failure

When a failure of a hardware component occurs, Q4 will flash red. Usually, a two digit error code is displayed on the connected display (such as E74).

Overheating

When the temperature of the console reaches an unusually high level, the console will shut off the CPU and GPU, run the fans at full speed and flash Q1 and Q3 until the console has cooled sufficiently.

General Hardware Failure

When a failure of one or more hardware components occurs, Q1, Q3, & Q4 will flash red. This is similar to the one light error, but there is no error code displayed on the connected display.

AV Cable Error

When the AV Cable is not detected, due to not being plugged in or due to a serious error, all four quadrants will flash red. This error code is not displayed on consoles with an HDMI connection.
