that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or  
demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment  
The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the  
child s social contexts especially the home and school Over the past decade the term executive function has become a  
buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting  
planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide  
a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers  
from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume  
who hail from several different countries in Europe and North America have certainly accomplished this goal in their
