Environmental Resilience and Sustainable Agri-food System Management Song Wang, Juan Lu, Yifang Liu, Jason Grant, 2025-12-05

The world is grappling with severe environmental degradation making environmental resilience a critical priority. Climate change intensifies this challenge with rising temperatures shifting weather patterns and extreme weather events threatening ecosystems and food security. In the agricultural sector, environmental pollution has worsened recently, contributing to soil degradation, water contamination, and biodiversity loss. Restoring the environment and enhancing agricultural resilience is crucial for sustainable agriculture. Addressing these challenges requires integrating environmental resilience with sustainable practices to create agri-food systems that are economically viable and resilient to climate change. This Research Topic aims to develop economically viable strategies that enhance the resilience of agri-food systems to environmental changes while promoting sustainable resource use and ecological balance. By focusing on effective methods to improve environmental resilience, we seek to create agri-food systems that are both profitable and capable of withstanding the challenges posed by climate change. Ultimately, enhancing environmental resilience is crucial for increasing agricultural sustainability and ensuring a stable food supply in the face of a changing climate.

High quality Original Research and Review articles in this field are all welcome for submission to this Research Topic. Research interests include but are not limited to the following areas: Enhancing environmental resilience in Agri-food Systems; Policy and innovative mechanisms for resilient and sustainable Agriculture; Ecological restoration and biodiversity conservation in Agri-ecosystems; Policy optimization and innovative mechanism towards a resilient Agri-food System; Climate change mitigation and adaptation in agricultural practices; Sustainable agricultural practices management; Resource management in agricultural practices; Climate risk in Agri-Food production and circulation.

Soil Management and Climate Change Maria Angeles Munoz, Raúl Zornoza, 2017-10-16

Soil Management and Climate Change: Effects on Organic Carbon, Nitrogen Dynamics, and Greenhouse Gas Emissions provides a state-of-the-art overview of recent findings and future research challenges regarding physical, chemical, and biological processes controlling soil carbon, nitrogen dynamics, and greenhouse gas emissions from soils. This book is for students and academics in soil science and environmental science, land managers, public administrators, and legislators, and will increase understanding of organic matter preservation in soil and mitigation of greenhouse gas emissions. Given the central role soil plays on the global carbon (C) and nitrogen (N) cycles and its impact on greenhouse gas emissions, there is an urgent need to increase our common understanding about sources, mechanisms, and processes that regulate organic matter mineralization and stabilization, and to identify those management practices and processes which mitigate greenhouse gas emissions, helping increase organic matter stabilization with suitable supplies of available N. Provides the latest findings about soil organic matter stabilization and greenhouse gas emissions. Covers the effect of practices and

[Economic and Societal Transformation in Pandemic-Trapped India](#) Subrata Saha,Mukunda Mishra,Anil Bhumali,2022-02-04 This book acquaints the reader with the critical changes in India s economy and society amidst the unprecedented pandemic outbreak of COVID 19 which has been devastating by breaking all prior records of illness and fatality The present crisis is shown to be more than an acute health hazard as it carries with it other threats associated with

the economy society culture psychology and politics The dynamic driving forces that have a significant bearing on life space and time are explored providing a basis on which social scientists can understand the prevailing equations and project the unforeseen future to contribute to a policymaking mechanism The Indian scenario presented here takes into account how the COVID 19 induced lockdown of transport services closing of factories and restrictions on mobilization have caused the economy to face a recession affecting mostly the unorganized sector Travel restrictions and quarantines affecting hundreds of millions of people have left Indian factories short of labour causing havoc in the production system Semi skilled jobholders have lost their employment and the country has witnessed the plight of large pools of migrant labourers returning on foot to their homelands hundreds of miles away with their families and belongings Contributors to this volume are drawn from diverse disciplines displaying the solidarity of academic knowledge in a physically divided world This common platform is provided to the practitioners of relevant academic disciplines under the umbrella of regional sciences a forum for the exchange of ideas that may be effective in the sustainable management of the crisis and a way forward after it is mitigated Thought provoking discussions regarding different facets of the crisis are relevant not only to the current times but also to being prepared for the unforeseen post COVID economic and societal order

Towards Sustainable Development Goal of Zero Hunger: Exploring the Dynamic Relationships between Food Pricing, Agriculture, and Food Security Noshaba Aziz, Wioletta Żukiewicz-Sobczak, Ruishi Si, 2025-10-16 United Nations Sustainable Development Goal SDG 2 aspires to eradicate hunger by 2030 emphasizing the intricate relationships between agriculture food security and nutrition However this noble pursuit faces formidable challenges in emerging countries due to a confluence of international disruptions Climate change the COVID 19 pandemic and geopolitical conflicts like the war in Ukraine have triggered sharp spikes in commodity prices amplifying food security concerns particularly in developing nations The Food and Agriculture Organization of the United Nations recently reported the highest global food price increase since the 1990s in March This commodity price inflation in turn reverberates across agriculture impacting not only a nation's economy but also its food production capacity Elevated commodity prices drive up the costs of agricultural inputs such as fertilizers pesticides and fuel compelling farmers to pass these expenses on to consumers in the form of higher food prices Moreover country specific economic factors within the agricultural sector including land ownership technology adoption farming practices and infrastructure further complicate the food security landscape Therefore the intricate interplay between commodity price inflation agriculture and food security is significantly influenced by a nation's unique economic dynamics within its agricultural sector Effectively addressing these challenges necessitates a blend of international and domestic policy measures to ensure that the benefits of agricultural progress reach the broader population
