CASIO.

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

- This watch does not have a time zone that corresponds to the UTC offset of -3.5 hours. Because of this, the radio-controlled timekeeping and World Time functions will not display the correct time for Newfoundland, Canada.

Applications

This built-in altimeter of this watch measures elevation, barometric pressure, temperature and altitude. Measured values and their trends on the display. Such features make this watch useful when hiking, mountain climbing, or when engaging in other such outdoor activities.

Warning!

- The measurement functions built into this watch are not intended for taking measurements that require professional or industrial precision. Values produced by this watch should be considered as measurement approximations only.
- The Moon phase indicator and tide graph data that appear on the display of this watch are not intended for navigation purposes. Always use proper instruments and resources to obtain data for navigation purposes.
- This watch is not an instrument for calculating low tide and high tide levels. The tide graph of this watch is intended to provide a reasonable approximation of tidal movements only.
- When engaging in mountain climbing or other activities in which losing your way can result in dangerous or life-threatening situations, always be sure to use a second compass to confirm direction readings.
- While CASIO COMPUTER CO., LTD. assumes no responsibility for any damage or loss suffered by you or any third party arising through the use of this product or its malfunction.

Keep the watch exposed to bright light

The electricity generated by the solar cell of the watch is stored by a built-in battery. Leaving or using the watch where it is not exposed to light causes the battery to run down. Make sure the watch is exposed to light as much as possible.

- When you are not wearing the watch, or your wrist, position the face so it is pointed at a source of bright light.
- You should try to keep the watch outside of your sleeve as much as possible. Changing its reduced sensitivity if the face is covered only partially.

- This watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down, which will result in some watch functions being disabled. If the battery gets dead, you will have to re-configure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

General Guide

- This illustration below shows which buttons you need to press to navigate between modes.
- In any mode, press **[D]** to minimize the display.

Battery charges in the light.

Battery discharges in the dark.

- The actual level at which some functions are disabled depends on the watch model.
- Frequent display illumination can run down the battery quickly and require charging. The following guidelines give an idea of the charging time required to recover from a single illumination application.
 - Approximately two minutes exposure to bright sunlight coming in through a window.
 - Approximately 20 minutes exposure to indoor fluorescent lighting.
- Be sure to read "Power Supply" for important information you need to know when exposing the watch to bright light.

If the display of the watch is blank...

- If the display of the watch is blank, it means that the watch's Power Saving function has turned off the display to conserve power.
- See "Power Saving" for more information.

About This Manual

- Depending on the model of your watch, display text appears either in dark figures on a light background (Module 3134), or light figures on a dark background (Module 3205). All sample displays in this manual are shown using dark figures on a light background.
- Button operations are indicated using the letters shown on the illustration.
- Each section of this manual provides you with the information you need to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

- You can use buttons **[A]**, **[B]**, and **[C]** to enter a sensor mode directly from the Timekeeping Mode or from another sensor mode. To enter a sensor mode from the Tide/Moon Data, Countdown Timer, Stopwatch, World Time, Alarm, Data Recall, or Receive Mode, first enter the Timekeeping Mode and then press the applicable button.
