CASIO

## Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

### Starting second hand movement and digital display

To conserve battery power, the watch is shipped from the factory with its functions disabled. Pressing any one of the watch's three buttons will activate its functions, which will start the second hand to start moving and the digital display to activate.

Your watch switches automatically between Standard Time and Daylight Saving Time (Summer Time). However, that switching cannot be performed correctly if the watch is not able to receive the time calibration signal. If you realize that the correct time is not displayed properly, see the procedure under "To perform manual receiver" or "To set the time and date manually" to correct it.

## General Guide

- Press **[C]** to change from mode to mode.
- About 1.2 seconds after you enter the Dual Time Mode, Alarm Mode, or Hand Setting Mode, the hands will move the position that indicates the current setting of the mode. You cannot change to another mode while the hands are moving. To change to another mode, enter press **[C]** before the hands stop to reach the next mode setting position.
- In Timekeeping mode (except when a setting screen is on the display), press **[C]** to illuminate the face of the watch.

Press **[C]**  
DST

## About This Manual

- Button operations are indicated using the letters shown in the illustration.
- Each section of this manual provides you with the information you need to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

### Expression Mode

### Dual Time Mode

## Time Calibration Signal Reception

There are two different methods you can use to receive the time calibration signal: auto receive and manual receive.

- **Auto Receive**  
With auto receive, the watch receives the time calibration signal automatically up to six times a day. When any auto receive is successful, the remaining auto receive operations are not performed. For more information, see "About Auto Receiver".
- **Manual Receive**  
Manual receive lets you start a time calibration receiver operation with the press of a button. For more information, see "To perform manual receiver".

### Precautions

- When getting ready to receive the time calibration signal, position the watch as shown in the nearby illustration, with its LCD screen side facing towards a window. Make sure there are no metal objects nearby.

- Make sure the watch is facing the right way.
- Signal reception can be difficult or even impossible under the conditions listed below.

- Signal reception is normally better at night than during the day.
- Time calibration signal reception takes from two to seven minutes, but in some cases it can take as long as 1.0 minutes. Days are that you do not perform any button operations in any mode the watch during this time.
- When within range of the appropriate transmitter, this watch can receive either the Germany (DAB/DAB+) or England (DAB+) time calibration signals. See "Transmission" for more information.

### Reception Ranges

## Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting accordingly. This time calibration signal includes both Standard Time and Daylight Saving Time (Summer Time) data.

- Supported time calibration signals: Germany (Mantelberg), England (Pophy).

### Current Time Setting

This watch updates its time setting automatically in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to specify your Home Time Zone, which is the time zone where you will normally use the watch. For more information, see "To specify your Home Time Zone" below.
- When using the watch outside the range of the time signal transmitter, you have to adjust the current time setting manually as required. See "Timekeeping" for more information about manual time settings.

### To specify your Home Time Zone

- In the Timekeeping Mode, hold down **[C]** until the GMT differential value starts to flash, which indicates the setting screen.
  - The second hand will move at high speed to the 12 o'clock position where it will stop.
  - The GMT differential value indicates the time difference in hours between Greenwich Mean Time and the currently selected time zone.
  - The DST indicator indicates that Daylight Saving Time (summer time) is turned on for the currently selected time zone.
- Use **[D]** (+) to select the time zone you want to use as your Home Time Zone.
  - The following are the GMT differential values for major cities in the Western European time zones.

Time Zone	Other major cities in same time zone
+0.0 (GMT +1.0)	London, Dublin, Lisbon, Casablanca, Dakar, Addis
+1.0 (GMT +2.0)	Paris, Milan, Rome, Madrid, Amsterdam, Athens, Hamburg, Frankfurt, Vienna, Stockholm, Berlin
+2.0 (GMT +3.0)	Athens, Cairo, Jerusalem, Moscow, Istanbul, Seoul, Damascus, Teheran

- Press **[C]** to exit the setting screen.
  - The second hand will advance at high speed to the correct position and resume normal movement from there.
  - Normally, your watch should show the correct time as soon as you specify your Home Time Zone. If it does not, it should adjust automatically after the next auto receive operation (in the middle of the night). You can also perform manual receive or you can set the time manually.
  - Selecting +0.0, +1.0, or +2.0 (+1.0, +2.0, or +3.0) while DST is turned on as your Home Time Zone automatically turns on auto receive. When auto receive is turned on and you are within the reception range, the watch will automatically receive the time calibration signal from the appropriate transmitter (in the middle of the night) and update its settings accordingly. For information about the relationship between time zones, GMT differential values, and transmitters, see "Transmission".
  - See the page under "Reception Ranges" for information about the reception ranges of the watch.
  - If you are in an area that does not use Daylight Saving Time (summer time), turn off the DST setting.
  - Even if the time calibration signal is received correctly, there are some times when the analog hands may not indicate the correct time. If this happens, use the procedures under "Adjusting the time of the hands" to check the home position of the hands, and make adjustments as required.
