PROPERTIES

Commutative Property	$a + b = b + a$	$ab = ba$
Associative Property	$(a + b) + c = a + (b + c)$	$(ab)c = a(bc)$
Distributive Property	$a(b + c) = ab + ac$	$a(b - c) = ab - ac$
Identity Property	$a + 0 = a$	$a \cdot 1 = a$
Addition Property of Equality	If you add (subtract, multiply or divide) the same thing to both sides of the equation, the equation is still balanced.	
Subtraction Property of Equality		
Multiplication Property of Equality		
Division Property of Equality		

$\sqrt{16} = 4$ because $4 \cdot 4 = 16$

$\sqrt{125} = 5$ because $5 \cdot 5 \cdot 5 = 125$

PROPERTIES OF EXPONENTS

Standards-based School Mathematics Curricula Sharon L. Senk, Denise R. Thompson, 2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of *Standards Based School Mathematics Curricula* provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research In addition to the references provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula including professors and graduate students interested in mathematics education curriculum development program evaluation or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research *Investigations in Mathematics Education*, 1976 **A 5-Year Study of the First Edition of the Core-Plus Mathematics Curriculum**

Classroom Assessment W. James Popham, 2005 I have an extremely high opinion of this textbook This is the only assessment text I have ever used that students actually read consistently Students frequently comment about their enjoyment of the text and their appreciation for the humor injected throughout the chapters Marcy Blackburn Cameron University The topics are presented very clearly are very well organized and are sufficiently comprehensive for pre service teachers Brian C McKeivitt Iowa State University Written in Jim Popham s characteristic witty style the Fourth Edition of Classroom Assessment addresses the range of assessments that teachers are likely to use in their classrooms The forces of accountability have changed educational assessment and this new edition now addresses the central issue of how classroom assessment can effectively benefit students when carried out in the context of accountability tests New legislation such as the No Child Left Behind Act NCLB and issues such as state standards that directly impact classroom testing and teaching are discussed to present readers with a series of practical action options In addition the text continues to analyze more traditional topics such as validity and reliability and discusses the alternative assessments used in today s classrooms
