Preparing Students for College and Careers Katie Larsen McClarty, Krista D. Mattern, Matthew N.

Gaertner, 2017-08-22 Preparing Students for College and Careers addresses measurement and research issues related to college and career readiness. Educational reform efforts across the United States have increasingly taken aim at measuring and improving postsecondary readiness. These initiatives include developing new content standards, redesigning assessments and performance levels, legislating new developmental education policy for colleges and universities, and highlighting gaps between graduates' skills and employers' needs. In this comprehensive book, scholarship from leading experts on each of these topics is collected for assessment professionals and for education researchers interested in this new area of focus. Cross-disciplinary chapters cover the current state of research, best practices, leading interventions, and a variety of measurement concepts, including construct definitions, assessments, performance levels, score interpretations, and test uses. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 license.

Foundations of Evidence-Based Medicine Milos Jenicek, 2019-09-19 This comprehensive text focuses on reasoning, critical thinking, and pragmatic decision making in medicine. Based on the author's extensive experience and filled with definitions, formulae, flowcharts, and checklists, this fully revised second edition continues to provide invaluable guidance to the crucial role that clinical epidemiology plays in the expanding field of evidence-based medicine. Key Features: Considers evidence-based medicine as a universal initiative common to all health sciences and professions and all specialties within those disciplines. Demonstrates how effective practice is reliant on proper foundations such as clinical and fundamental epidemiology and biostatistics. Introduces the reader to basic epidemiological methods, meta-analysis, and decision analysis. Shows that structured, modern argumentative reasoning is required to build the best possible evidence and use it in practice and research. Outlines how to make the most appropriate decisions in clinical care, disease prevention, and health promotion. Presenting a range of topics seldom seen in a single resource, the innovative blend of informal logic and structured evidence-based reasoning makes this book invaluable for anyone seeking broad, in-depth, and readable coverage of this complex and sometimes controversial field. *Commerce Business Daily*, 1998-07.
