

1 Applications

The T1073 programmable wall switch can be used in a single-switch or 3-way installation with the following types of lighting:

- Incandescent
- Halogen
- Low-voltage halogen with transformer
- Fluorescent

The T1073 switch cannot be used with a load of less than 40 W or more than 500 W.

2 Installation

- 1 Cut power at the circuit breaker to avoid electric shock.
- 2 Remove the existing switch. (For a 3-way installation, identify and label the wire connected to the "common" screw.)
- 3 Install the new switch (see the appropriate section below).
- 4 Apply power at the circuit breaker.

WARNING: Disconnect power to the switch when replacing a light bulb (see section 4).

SINGLE-SWITCH INSTALLATION

Connect the LINE and 3-WAY wires to the line (120 V) wire and LOAD wire to the load. Connect the GND wire to a ground screw inside the electrical box.

EXISTING 3-WAY INSTALLATION

Connect the LOAD wire on the T1073 to the "common" wire, which you identified when removing the old switch. Connect the GND wire to a ground screw inside the electrical box. Connect the LINE and 3-WAY wires to the two remaining wires. At the other 3-way switch, connect the jumper wire between the "common" screw and the screw where the LINE wire of the T1073 is connected.

NEW 3-WAY INSTALLATION

3 Quick Start-up

Set the time and date before using the switch for the first time.

The T1073 will turn the lights on at sunset and turn them off at 11:00 pm by default. If these settings are appropriate for you, you only need to set the time and date (see shaded area in the menu flowchart sheet). If the switch's sunset time does not correspond to the actual sunset time, see sections 5.2.2 and 5.2.4.

4 Operation

Indicates the mode of operation (see Section 5.1).

Indicates the time and day.

Indicates the current program.

Indicates the load state.

Briefly press this button to turn the lights on or off. See "Temporary Override" in Section 5.1.4.

Press for 3 seconds to enter the setup menu.

The 2 icon indicates the current program has been activated at sunset.

The 3 icon indicates the current program has been activated at sunrise.

Press this button to display today's sunset time.

Press this button to display today's sunrise time.

The LED illuminates when the load state is on.

Safety switch
Before replacing a light bulb, pull out to disconnect power to the switch. This prevents, while the bulb is out, any possible short circuit which will damage the switch. Push back in after the light bulb is replaced.

5 Setup Menus

Press the main button for 3 seconds to enter the setup menu. Refer to the menu flowchart sheet on how to navigate the menu.

5.1 Mode Menu

Use the Mode menu to select one of the three modes of operation (see sections 5.1.1 to 5.1.3).

5.1.1 Manual Mode

In Manual mode, the T1073 operates like a regular switch. To turn the lights on or off, briefly press the main button. The 2 icon appears when the switch is in Manual mode.

5.1.2 Automatic Mode

In Automatic mode, the T1073 turns the lights on or off according to the set programs (see Section 5.4). The 3 icon as well as the current program number are displayed.

5.1.3 Random Mode

In Random mode, the T1073 has no specific times to turn the lights on or off. This mode is designed to give the impression the house is occupied during your absence. It is similar to the Automatic mode except there is no fixed program. The programs are automatically set to different times by the T1073 every day. The 3 icon appears when the switch is in Random mode.

The first "On" program occurs at sunset. Each "On" program lasts between 1 hour and 1 hour and 30 minutes; each "Off" program lasts between 15 and 30 minutes. The last "Off" program occurs between 10:30 pm and midnight.

5.1.4 Temporary Override

When the T1073 is in Automatic or Random mode, you can press the main button at any time to override the default state for the current program. The lights will turn off if they are on and vice versa. The new state icon (On or Off) flashes to indicate that the state is temporary. The new state is maintained until you press the main button again or till the next "On" or "Off" program.
