important issue amongst governments and populations since the global economic downturn This textbook provides an accessible and critical synthesis of urban regeneration in the UK analyzing key policies approaches issues and debates It places the historical and contemporary regeneration agenda in context The second edition has been extensively revised and updated to incorporate advances in literature policy and case study examples as well as giving greater discussion to the New Labour period of urban policy and the urban agenda and regeneration policies of the Conservative Liberal Democrat Coalition government elected in 2010 The book is divided into five sections with Section I establishing the conceptual and political framework for urban regeneration in the UK Section II traces policies that have been adopted by central government to influence the social economic and physical development of cities including early town and country and housing initiatives community focused urban policies of the late 1960s entrepreneurial property led regeneration of the 1980s competition for urban funds in the 1990s urban renaissance and neighborhood renewal policies of the late 1990s and early 2000s and new approaches since 2010 which have sought to stimulate enterprise and embrace localism in an age of austerity resulting from the global economic downturn Section III illustrates the key thematic policies and strategies that have been pursued by cities themselves focusing particularly on improving economic competitiveness tackling social disadvantage and promoting sustainable urban regeneration Section IV summarizes key issues and debates facing urban regeneration in the early 2010s and speculates upon future directions in an era of economic and political uncertainty Urban Regeneration in the UK combines the approaches taken by central government and cities themselves to regenerate urban areas providing a comprehensive and up to date synthesis of the field Each chapter also contains case studies study questions suggested further reading and websites making this an essential resource for undergraduate students interested in Urban Studies Geography Planning and the Built Environment

Understanding the Active Economy and Emerging Research on the Value of Sports, Recreation, and Wellness Finch, David J., Legg, David, 2021-06-04 The active economy incorporates several disciplines that include sport performance sport business recreation tourism physical activity urban planning leisure and health and wellness among others From an academic and policy perspective these disciplines are typically viewed as distinct with only limited spillover and consequently limited research explores the interaction between them However each individual sector can be studied as interdependent rather than autonomous By viewing the various sectors as part of a complex active ecosystem policymakers and practitioners are better positioned to shape broad opportunities while maximizing the community value of sports recreation and wellness Understanding the Active Economy and Emerging Research on the Value of Sports Recreation and Wellness provides a new view on the fields of sport recreation and health and wellness by exploring the interaction between these traditional separate disciplines It includes sub groups of the active economy such as health and wellness active apparel and accessories active equipment and sports betting but also ties in sub groups from the ancillary sector such as tourism design and infrastructure media and content and professional services This book is intended for

professionals educators and researchers working in the fields of sports recreation and health and wellness as well as economists executives managers practitioners stakeholders researchers academicians and students interested in how sports recreation and wellness operate in the active economy
