

A man with short dark hair and a light beard is shown from the chest up, wearing a black ribbed turtleneck sweater. He is looking slightly to his right with a serious expression. The background is dark and textured. Overlaid on the image is the text 'Addicted TO HIM' in a mix of pink cursive and white serif fonts. A small pink cherry blossom branch is positioned between the 'H' and 'I' of 'HIM'.

**Unmasking Addiction!** Pierre J. Samaan Ph.D.,2024-05-23 Unmasking Addiction delves into the intricate interplay of spirit soul and body in addiction revealing its complex origins and pathways The book explores six critical areas the spiritual and behavioral roots of addiction the characteristics of the addictive personality the impact of substances on the brain and comprehensive strategies for recovery and preventing relapse This insightful guide peels back the layers of addiction offering a profound understanding and practical approaches to healing We hope the insights shared here will serve as a valuable resource for those seeking to understand more about addiction whether for personal growth to support a loved one or to enhance professional practice in addiction counseling and recovery

*The British Journal of Inebriety (alcoholism and Drug Addiction)* ,1917 Contains papers read at the quarterly meetings of the society and extracts from the discussions following them with other communications dealing with alcohol and alcoholism

*The Globalisation of Addiction* Bruce K. Alexander,2008 The Globalisation of Addiction presents a radical rethink about the nature of addiction Scientific medicine has failed when it comes to addiction There are no reliable methods to cure it prevent it or take the pain out of it There is no durable consensus on what addiction is what causes it or what should be done about it Meanwhile it continues to increase around the world This book argues that the cause of this failure to control addiction is that the conventional wisdom of the 19th and 20th centuries focused too single mindedly on the afflicted individual addict Although addiction obviously manifests itself in individual cases its prevalence differs dramatically between societies For example it can be quite rare in a society for centuries and then become common when a tribal culture is destroyed or a highly developed civilization collapses When addiction becomes commonplace in a society people become addicted not only to alcohol and drugs but to a thousand other destructive pursuits money power dysfunctional relationships or video games A social perspective on addiction does not deny individual differences in vulnerability to addiction but it removes them from the foreground of attention because social determinants are more powerful This book shows that the social circumstances that spread addiction in a conquered tribe or a falling

civilisation are also built into today's globalizing free market society. A free market society is magnificently productive but it subjects people to irresistible pressures towards individualism and competition, tearing rich and poor alike from the close social and spiritual ties that normally constitute human life. People adapt to their dislocation by finding the best substitutes for a sustaining social and spiritual life that they can, and addiction serves this function all too well. The book argues that the most effective response to a growing addiction problem is a social and political one rather than an individual one. Such a solution would not put the doctors, psychologists, social workers, policemen, and priests out of work but it would incorporate their practices in a larger social project. The project is to reshape society with enough force and imagination to enable people to find social integration and meaning in everyday life. Then great numbers of them would not need to fill their inner void with addictions.

**Assessment in Health and Sport Psychology** Jose Luis Pastrana-Brincones, Antonio Hernández-Mendo, Verónica Morales-Sánchez, 2025-09-18. The COVID 19 pandemic has led to significant changes in our way of life and work resulting in the widespread adoption of online tools. Web browsers and smart mobile devices are now being utilized for conducting health and sport psychological assessments. This trend offers numerous advantages such as efficient data collection, error prevention, and the ability to employ data mining, mixed methods, statistics, and other analytical techniques for data processing. This research topic aims to explore a wide range of case studies, tools, techniques, and applications that can be utilized for sport and health psychological assessment and evaluation. It seeks to investigate how data can be collected, analyzed, processed, and shared across various disciplines within the sports and health psychology domains.
