Professor Stephen A Cook is a pioneer of the theory of computational complexity His work on NP completeness and the P vs
NP problem remains a central focus of this field Cook won the 1982 Turing Award for his advancement of our understanding
of the complexity of computation in a significant and profound way This volume includes a selection of seminal papers
embodying the work that led to this award exemplifying Cook s synthesis of ideas and techniques from logic and the theory of
computation including NP completeness proof complexity bounded arithmetic and parallel and space bounded computation
These papers are accompanied by contributed articles by leading researchers in these areas which convey to a general
reader the importance of Cook s ideas and their enduring impact on the research community The book also contains
biographical material Cook s Turing Award lecture and an interview Together these provide a portrait of Cook as a
recognized leader and innovator in mathematics and computer science as well as a gentle mentor and colleague **Boolean**
Function Complexity Michael S. Paterson,1992-11-05 By considering the size of the logical network needed to perform a
given computational task the intrinsic difficulty of that task can be examined Boolean function complexity the combinatorial
study of such networks is a subject that started back in the 1950s and has today become one of the most challenging and
vigorous areas of theoretical computer science The papers in this book stem from the London Mathematical Society
Symposium on Boolean Function Complexity held at Durham University in July 1990 The range of topics covered will be of
interest to the newcomer to the field as well as the expert and overall the papers are representative of the research
presented at the Symposium Anyone with an interest in Boolean Function complexity will find that this book is a necessary
