WHAT ARE WE? José Luis Manzanares Japón, 2021-06-01 Science has failed to explain the deep nature of reality While it surprises us every day with amazing new discoveries that make life more pleasant it ignores the real basis of our existence Its reductionist wager on materialism has never been able to specify the nature of the spirit or explain its decisive role in the great transformations the world undergoes Why does the ambition of an enlightened person provoke a war that kills millions of lives or the word of a prophet radically change the future of a society It has not even taken on the task of establishing a theory of love with the excuse that it is the fruit of chemical reactions It thus places it on the same level as indigestion Nor has it found the material mechanisms of physics Existence is guided by mathematical equations that act as laws that Nature must follow but nobody knows why they are obeyed Gravity attracts us without our being able to perceive the force that tugs at our feet and drags us to the ground The same is true of electric charges No one can explain why a wavenumber is able to carry energy indefinitely through a vacuum or how information can travel through the universe faster than light We do not know what energy is or
