International Handbook on the Demography of Marriage and the Family D. Nicole Farris, A. J. J.

Bourque, 2020-03-31 This handbook provides a global perspective on contemporary demographic theories and studies of marriage and the family. Inside readers will find a comprehensive analysis that enables demographic comparison between and across international borders. Coverage is centered around four main sections that present a history of marriage and the family, detail relevant data and measurement concerns, examine global marriage practices, analyze interactions of such demographic characteristics as age, sex, and race with marriage and the family, and consider public policy, contemporary trends, and future directions. In addition, the book includes research on current social issues such as alternative family structures, cohabitation, divorce, boomerang children, and adoption. The family is universal but extremely varied in form and function. This handbook provides students, researchers, and policymakers with an all-inclusive international demographic analysis that fully investigates the diverse nature of the modern family.

Handbook of Research on Globalization, Investment, and Growth-Implications of Confidence and Governance Das, Ramesh Chandra, 2015-04-30 The global economic crises of recent years have offered some sobering lessons, compelling economists, political scientists, and policymakers to reconsider traditional theories regarding the cultivation of developing nations. The Handbook of Research on Globalization, Investment, and Growth: Implications of Confidence and Governance seeks to empirically explore the relationship between a number of variables including consumer confidence, private sector performance, and governmental regulation. Targeting academics, social scientists, financial professionals, and lawmakers, this book seeks to categorize and analyze developing economies in a post-crisis global financial landscape in order to help shape desperately needed policies capable of safeguarding against potential catastrophe.

Framework to implement a life course approach in practice World Health Organization, 2025-07-03 The WHO Framework to implement a life course approach in practice summarizes current evidence to reorient health systems to produce health and well-being, draws on global examples of implementation, and proposes next steps. A life course approach acknowledges that health and well-being depend on the interaction of multiple protective and risk factors, particularly during sensitive and critical periods throughout people's lives and across generations. It strengthens equity by recognizing how critical periods, transitions, and cumulative exposures shape health trajectories. This framework targets a wide audience, including governments, civil society, and other non-state actors committed to applying a life course approach and informs discussions on redesigning primary health care programmes to improve life course health trajectories. The framework provides a strategic lens to advance universal health coverage and adapt systems to evolving needs by promoting health capacities and well-being. Conceptual foundations on how genetic, biological, psychosocial, and environmental factors shape health and well-being across the life course and intergenerational health. Six core principles essential for operationalizing a life course approach. Country examples on implementation showing how services are being

reoriented Strategic actions needed to implement the approach including multisectoral action and improved data and financing
