CPD in the Built Environment Greg Watts, Norman Watts, 2021-04-30 The aim of this book is to provide a single source of information to support continuing professional development CPD in the built environment sector The book offers a comprehensive introduction to the concept of CPD and provides robust guidance on the methods and benefits of identifying planning monitoring actioning and recording CPD activities It brings together theories standards professional and industry requirements and contemporary arguments around individual personal and professional development Practical techniques and real life best practice examples outlined from within and outside of the industry empower the reader to take control of their own built environment related development whilst also providing information on how to develop fellow staff members The contents covered in this book align with the requirements of numerous professional bodies such as the Royal Institution of Chartered Surveyors RICS the Institution of Civil Engineers ICE and the Chartered Institute of Builders CIOB The chapters are supported by case studies templates practical advice and guidance The book is designed to help all current and future built environment professionals manage their own CPD as well as managing the CPD of others This includes helping undergraduate and postgraduate students complete CPD requirements for modules as part of a wide range of built environment university degree courses and current built environment professionals of all levels and disciplines who wish to enhance their careers through personal and professional development whether due to professional body requirements or by taking control of identifying and achieving their own educational needs [ICE Manual of Geotechnical Engineering Volume 1](#) Hilary Skinner, D G Toll, Kelvin Higgins, Mike Brown, John Burland, 2023-11-17 ICE Manual of Geotechnical Engineering Second edition brings together an exceptional breadth of material to provide a definitive reference on geotechnical engineering solutions Written and edited by leading specialists each chapter provides contemporary guidance and best practice knowledge for civil and structural engineers in the field **The Drift of Sea Ice** Matti Leppäranta, 2011-03-22 The Second Edition of The Drift of Sea Ice presents the fundamental laws of sea ice drift which come from the material properties of sea ice and the basic laws of mechanics The resulting system of equations is analysed for the general properties of sea ice drift the free drift model and analytical models for ice drift in the presence of internal friction and the construction of numerical ice drift models is detailed This second edition of a much lauded work unique on this topic in the English language has been revised updated and expanded with much new information and outlines recent results in particular in relation to the climate problem mathematical modelling and ice engineering applications The current book presents the theory observations mathematical modelling techniques and applications of sea ice drift science The theory is presented from the beginning on a graduate student level so that students and researchers coming from other fields such as physical oceanography meteorology physics engineering environmental sciences or geography can use the book as a source book or self study material First the drift ice material is presented ending with the concept of ice state the relevant properties in sea ice dynamics Ice kinematics

observations are widely presented with the mathematical analysis methods and thereafter come drift ice rheology to close the triangle material kinematics stress The momentum equation of sea ice is derived in detail and its general properties are carefully analysed Then follow two chapters on analytical models free drift and drift in the presence of internal friction These are very important tools in understanding the dynamical behaviour of sea ice The last topical chapter is numerical models which are the modern tool to solve ice dynamics problem in short term and long term problems The closing chapter summarises sea ice dynamics applications and the need of sea ice dynamicknowledge and gives some final remarks on the future of this branch of science

The State of Knowledge from Operational Ice Service Perspectives: Previous and Future Mandates John Falkingham, Wolfgang Dierking, Andrew Fleming, Penelope Wagner, Ed Blockley, Nick Hughes, Ludovic Brucker, 2026-02-04 Operational ice services play a crucial role in ensuring maritime safety in ice affected waters by providing routine information and forecasts These services operate within a global community sharing data and resources to enhance their capabilities The changing climate has made marine operations in ice covered areas more dynamic increasing the demand for high quality ice information Despite the availability of large volumes of satellite data and improved forecast models there is a pressing need for research to transform this data into actionable information for safe navigation National ice and weather services adhering to World Meteorological Organization WMO standards are the authoritative sources for this information facilitating critical exchanges between different national services However there is a need for these services to expand their offerings to include more detailed sea ice parameters and forecasts which will require the integration of advanced automation techniques not yet demonstrated by current products This research topic aims to explore the operational mandates of ice services communicate the necessary research to support future maritime activities and clarify the relationship between data and operational centers The objectives include disseminating information on how individual ice services function identifying research that can enhance maritime safety and providing clear examples of useful research through complementary submissions By addressing these goals the research topic seeks to bridge the gap between data availability and practical application ultimately improving navigation safety in ice affected waters To gather further insights into the operational and research aspects of ice services we welcome articles addressing but not limited to the following themes Individual operational ice service mandates and routine products Automatic sea ice classification using multi frequency SAR band synergies Automated ice mapping for navigational support New sensor capabilities for ice classification and mapping Short term and long term sea ice forecasting Long term trends and validation from ice chart archives Assessment of uncertainties in sea ice mapping techniques Review of Antarctic sea ice forecasting experiments Sea ice modeling and data assimilation for forecasting Ice edge prediction systems and their operational deployment Climatology of regional and hemispheric sea ice Navigability assessment of East Antarctic coastal sites for non icebreakers
