A Budgeting Guide Local Government:

A Budgeting Guide for Local Government Robert L. Bland, 2013 4th edition of the premier text on local government budgeting revenues and financing

A Budgeting Guide for Local Government Robert L. Bland, Michael R. Overton, 2019

Navigating the increasingly complex crosscurrents of local government finance has become an essential skill for today's public administrator. The convergence of rising expectations from citizens and council members, anemic growth in revenue sources, and unfunded pensions now coming due has complicated the local manager's task of preparing a budget that balances revenues with expenditures. More fundamentally, today's managers must deliver services at a time when public confidence in government and its ability to perform have reached unparalleled lows. This book examines the issues that a local manager confronts in developing a budget: both the choice of public services and projects to provide and the choice of revenue sources used to pay for them. When formulating a budget, the manager must balance what is economically best, politically expedient, and administratively possible. Because the manager must also respond to citizens' perceptions of an issue, whatever their accuracy, this book also examines budgets in those terms. In a more general sense, effective leadership requires that the public administrator shape as well as follow public opinion. The recommendations made throughout this book are designed to enhance citizens' confidence in the responsiveness and competence of local government leaders.

Budgeting for Local Governments and Communities is designed as the primary textbook for a quarter or semester long course in public budgeting and finance in an MPA programme. Many currently available texts for this course suffer from a combination of defects that include a focus on federal and state budgeting, a lack of a theoretical governance framework, an omission of important topics, and typically a lack of exercises and datasets for student use. Budgeting for Local Governments and Communities solves all of these problems. The book is exceptionally comprehensive and well written and represents the efforts of veteran authors with both teaching and real world experience.

Key Features

Special Focus on Local Government Budgeting focuses exclusively on budgeting at the local levels of American government which are responsible for spending 40 percent of the taxes collected from citizens.

Integration of Theory and Practice teaching cases and chapters capture the lessons learned by professional practitioners who have extensive experience in making local public budgeting work on the ground.

Polity Approach to Local Budgeting presents an introduction to local budgeting as the central political activity that integrates the resources of the community into a unified whole.

Budgeting is presented as governance work rather than as a unique set of skills possessed by analysts and financial specialists.

Legal, Historical, Economic and Moral Foundations of Local Government Budgeting provides readers with an understanding of how the structures and processes of local budgeting systems are firmly tethered to the underlying core.
