*Graph-Theoretic Concepts in*

*Computer Science* Juraj Hromkovič, Manfred Nagl, Bernhard Westfechtel, 2005-01-25 During its 30 year existence the International Workshop on Graph Theoretic Concepts in Computer Science has become a distinguished and high quality computer science event The workshop aims at uniting theory and practice by demonstrating how graph theoretic concepts can successfully be applied to various areas of computer science and by exposing new theories emerging from applications In this way WG provides a common ground for the exchange of information among people dealing with several graph problems and working in various disciplines Thereby the workshop contributes to forming an interdisciplinary research community The original idea of the Workshop on Graph Theoretic Concepts in Computer Science was ingenuity in all theoretical aspects and applications of graph concepts wherever applied Within the last ten years the development has strengthened in particular the topic of structural graph properties in relation to computational complexity This workshop has become pivotal for the community interested in these areas An aim specific to the 30thWG was to support the central role of WG in both of the prementioned areas on the one hand and on the other hand to promote its originally broader scope The 30th WG was held at the Physikzentrum Bad Honnef which serves as the main meeting point of the German Physical Society It offers a secluded setting for research conferences seminars and workshops and has proved to be especially stimulating for fruitful discussions Talks were given in the new lecture hall with a modern double rear projection interactive electronic board and full video conferencing equipment
