Subject Guide to Books in Print, 1997 **Forthcoming Books** Rose Army, 2003-04 **Books in Print Supplement**, 1994 **Scientific and Technical Books in Print**, 1972 Paperbound Books in Print 1995 Reed Reference Publishing, Reference Reed, 1995-12 *Relaxation and Decomposition Methods for Mixed Integer Nonlinear Programming* Ivo Nowak, 2006-03-28 Nonlinear optimization problems containing both continuous and discrete variables are called mixed integer nonlinear programs MINLP. Such problems arise in many fields such as process industry engineering design communications and finance. There is currently a huge gap between MINLP and mixed integer linear programming MIP solving technology. With a modern state of the art MIP solver it is possible to solve models with millions of variables and constraints whereas the dimension of solvable MINLP is often limited by a number that is smaller by three or four orders of magnitude. It is theoretically possible to approximate a general MINLP by a MIP with arbitrary precision. However, good MIP approximations are usually much larger than the original problem. Moreover, the approximation of nonlinear functions by piecewise linear functions can be difficult and time-consuming. In this book, relaxation and decomposition methods for solving nonconvex structured MINLPs are proposed. In particular, a generic branch and price BCP framework for MINLP is presented. BCP is the underlying concept in almost all modern MIP solvers. Providing a powerful decomposition framework for both sequential and parallel solvers, it made the success of the current MIP technology possible. So far, generic BCP frameworks have been developed only for MIP, for example COIN BCP, IBM 2003 and ABACUS OREAS GmbH 1999. In order to generalize MIP BCP to MINLP, BCP, the following points have to be taken into account: A given sparse MINLP is reformulated as a block separable program with linear coupling constraints. The block structure makes it possible to generate Lagrangian cuts and to apply Lagrangian heuristics. In order to facilitate the generation of polyhedral relaxations, nonlinear convex relaxations are constructed. The MINLP separation and pricing subproblems for generating cuts and columns are solved with specialized MINLP solvers. **The Cumulative Book Index**, 1997 A world list of books in the English language **The British National Bibliography** Arthur James Wells, 1996 *Scientific and Technical Books and Serials in Print*, 1989 *Applied Mechanics Reviews*, 1989 **Student Solution Manual for Discrete Mathematics** John A.
