SAVE THESE INSTRUCTIONS

READ ALL INSTRUCTIONS BEFORE STARTING TO MAKE ICE CREAM. To make and pack up to 4 quarts of cream, you will need about 15 pounds of crushed ice and either 4 cups of table salt or 8 cups of rock salt.

Size of Freezer	Ice for Making Ice Cream	Ice for Ripening and Hardening Ice Cream	Rock Salt for Making Ice Cream	Rock Salt for Ripening and Hardening Ice Cream	Tablesalt for Making Ice Cream	Tablesalt for Ripening and Hardening Ice Cream
4 Quarts	15 Lbs. of Crushed Ice	5 Lbs. of Crushed Ice	2 cups	2 cups	2 cups	2 cups

HOW TO USE YOUR FREEZER

1. Wash the beater, top and cream can well before using. Let the parts **cool** before using, as you will get much faster freezing of your cream if parts are cold.
2. Put beater in can, making sure it is set well in bottom of can. Pour in mixture to be frozen, made from your favorite recipe or one of the delicious recipes shown on this sheet. The mixture should be cool before pouring in can for faster, more even freezing. Fill the can only two-thirds full (up to fill line stamped on can) to allow for expansion!
3. Put top on can and place can in polyethylene tub, making sure that can is centered on can rest in bottom of tub.
4. Attach motor making sure beater is still set properly in can and can is still on bottom rest in tub. **Latch down well** by pushing thumb lock over prong on motor frame.
5. Plug motor in before packing ice and salt. The can will begin to turn steadily to the right.

NOTE: The beater is not made to turn. It stays still, and the can turns around it.

6. Packing Ice and Salt — Use **either crushed ice cubes or crushed** store-bought ice. (The finer the ice is crushed, the better it is, as the freezer is made to operate with crushed ice. Also, finely crushed ice will melt more evenly and will, therefore, give you a smoother textured ice cream.)

A. In packing, put about three inches of ice in tub all around can, and sprinkle about 3 oz. of table salt, or 5 oz. of rock salt, evenly over ice.

B. Continue adding ice and salt (in the above proportions) layer by layer, until tub is filled up to, but not over, top of can.

C. When tub is half full, (approx. 2 layers of ice and salt) pour one cup of cold water over the ice and salt mixture. This will help the ice to melt and settle, which will shorten freezing time, and will help keep ice from jamming and causing stops. After tub is filled, pour another cup of cold water over the ice and salt.

D. As the ice melts and settles, you will need to add more ice and salt to keep it up to, but not over, top of can.

E. Before the cream is finished, the ice will melt enough to cause water to flow from the drain hole. Never let this drain hole become stopped up with ice. (The cork supplied is not for this drain hole. It is for the can top, as described in step 9.)

CAUTION: Do not allow ice, salt, or water to get in air holes at base or top of motor housing, as this will cause the motor to rust.

7. The motor should run for 20-30 minutes or until the cream is the consistency of mush (See Hints for Making Better Ice Cream on reverse side of this sheet). The motor has an automatic reset switch which will prevent motor damage when it naturally stops when cream is ready or if, for some reason, it stops before cream is ready. If the freezer stops and the motor is not unplugged, the motor will cut off and will stay off until it cools down. It will continue to cut off and on until the motor is unplugged. This **off/on** action will not cause any motor damage.

NOTE: Freezer may become clogged with chunks of cracked ice, which can cause unit to stall before cream is made. If this happens, simply restart unit by turning can with hands.

8. After cream is ready, remove motor unit. Wipe all ice and salt from can top and then remove the top. Hold can down on bottom rest while taking out beater. The ice cream should be **about the texture of mush**. Scrape the cream from beater and pack down with long handed spoon. (If you wish to ripen or harden the ice cream further, see step 9.)

9. Ripening and Hardening Ice Cream — After the cream has been packed down place the cork in can top and put can top back on freezer. Repack freezer (allowing water to remain in tub up to drain hole), with more ice and salt (approximately 3 oz. of table salt or 5 oz. of rock salt, to every two double handfuls of ice), until can and top are completely covered. Cover freezer with heavy towel or newspaper and set away in a cool place until time to serve. The cream will now freeze hard. If you want to hold the cream for more than an hour before using, add more ice and salt (in above proportions) to keep the can and top covered.
