

## Initial Certification in Medical Physics

### Part 1 Content Guides and Sample Questions

**PLEASE NOTE: List of Constants and Physical Values for Use on the Part 1 Physics Exam**

The ABR provides candidates with a list of constants, physical values, and related information, which can be found on [this page](#). While the list includes many constants and physical values, the ABR does not warrant the list as a compilation of all constants and physical values needed on the exams. Candidates should review the list carefully before their exams to familiarize themselves with the contents and list organization.

### Content Guides

The content of all ABR exams is determined by a panel of experts who select the items based on a content guide that the ABR publishes. The content guides are assembled using guidance from medical physics organizations. The content guides are general documents, and individual exam items may not appear to be exactly congruent with the content listed in the guide. In addition, since there is only a limited number of items on any exam, selected items will only be a sample from the larger domain of the content guide.

### Part 1: General Content Guide

**Core Tax Legislation and Study Guide 2022** Stephen Barkoczy, 2022-01-12 Core Taxation Legislation and Study Guide is a reference text for students undertaking tax subjects. It provides curated extracts of legislation as well as useful guidance on study skills. Part 1 The Study Guide assists students to prepare for a tertiary taxation course and conduct basic taxation research. It refers to key reference material including websites and research tools and includes useful tips on study techniques, researching a tax problem, essay writing and presentation, answering taxation law exam questions and how to cite legislation, cases, articles, rulings and reports for assignments. Part 2 The Core Tax Legislation comprises selected extracts from relevant sections of taxation legislation and regulations. An essential resource, this text allows students to access the parts of the legislation they will need for a taxation law course in a time-saving and user-friendly way. Core Taxation Legislation and Study Guide 2022 is designed to be used in conjunction with Foundations of Taxation Law 2022. *Review of Medical Dosimetry* William Amestoy, 2015-03-03 This study guide will be a reliable support and easy-to-use source of information for students in the fields of dosimetry, physics, radiation oncology and therapy as they progress through the educational levels in preparation for board examinations. The theoretical and practical knowledge gained by students on previous courses or in clinical settings is reinforced by means of almost 1200 questions and accompanying detailed analytical answers. In order to cater for the needs of all students, the questions are arranged according to three levels of difficulty. The level 1 questions are mainly intended for those hoping to pass the Medical Dosimetrist Certification Board (MDCB) exam but will also be beneficial for Medical Physics candidates taking written exams and for Radiation Oncology residents. The level II questions are in general clinically related and will be relevant for any student, while the level III questions are advanced and are especially suitable for American Board of Radiology candidates or those taking equivalent exams elsewhere in the world. The study guide is broken down into different subject areas with provision of multiple questions and answers on each subject. In addition, the mathematical and physics questions include brief explanations of how the student can solve each problem. At the end of the guide, three practice tests are included with the same number of questions as are found in the MDCB exam. These tests will help students to test their knowledge and improve their test-taking speed.
