The European Union and the Geopolitics of the Arctic Andreas Raspotnik,2018-01-26 The Arctic is a region that has seen exponential growth as a space of geopolitical interest over the past decade This insightful book is the first to analyse the European Union s Arctic policy endeavours of the early 21st Century from a critical geopolitical perspective

Demographic Change and Long-Run Development Matteo Cervellati,Uwe Sunde,2017-10-27 Recent approaches to economic demography investigating the effect of the transition to low mortality and low fertility on economic development Over the last two hundred years mortality and fertility levels in the Western world have dropped to unprecedented levels This demographic transition was accompanied by an economic transition that led to widespread education and economic growth after centuries of near stagnation At the same time other changes have occurred in family structures culture and the organization of society Economists have only recently begun to take into account the demographic transition from high mortality and high fertility when modeling and researching economic development This CESifo volume reviews recent approaches to economic demography considering such topics as the bio geographic origins of comparative development differences the role of health improvements and mortality decline as well as physiological familial cultural and social aspects After an overview of the study of demography and economic demography the chapters cover subjects including the Neolithic era and the period of the formation of states and social institutions longevity and economic growth household decision making and fertility land inequality education and marriage in nineteenth century Prussia and caste systems and technology in pre modern societies The book concludes with a call for further investigation of the institutional and social factors that influence demographics and economies suggesting that unified growth theory offers a potential approach to studying development Contributors Matteo Cervellati Francesco Cinnirella David de la Croix Carl Johann Dalgaard Matthias Doepke Elena Esposito Davide Fiaschi Tamara Fioroni Oded Galor Boris Gershman Erik Hornung Fabian Kindermann Nils Petter Lagerl f Holger Strulik Uwe Sunde David N Weil

Regional Research Frontiers - Vol. 1 Randall Jackson,Peter Schaeffer,2017-04-17 This volume focuses on frontiers in regional research and identifies trends and future developments in the areas of innovation regional growth and migration It also addresses topics such as mobility regional forecasting and regional policy and includes expert contributions on disasters resilience and sustainability Building on recent methodological and modelling advances as well as on extensive policy analysis experience top international regional scientists identify and evaluate emerging new conceptual and methodological trends and directions in regional research This book will appeal to a wide readership from regional scientists and economists to geographers quantitatively oriented regional planners and other

related disciplines It offers a source of relevant information for academic researchers and policy analysts in government and is also suitable for advanced teaching courses on regional and spatial science economics and political science Mirror Images in Different Frames? Francis E Hutchinson,2015-04-09 In the early 1990s Singapore the Malaysian state of Johor and the Riau Islands in Indonesia sought to leverage their proximity differing factor endowments and good logistics connections to market themselves as an integrated unit Beyond national level support in all three countries the initiative had the support of state and provincial leaders in Johor and Riau respectively Now however the situation is markedly different The Malaysian government and its Johorean equivalent have invested considerable resources in encouraging closer integration with Singapore For its part the Indonesian central government has been promoting special economic zones and export oriented activities However the provincial government of the Riau Islands has turned away from export oriented industrialization preferring instead to promote cultural sub nationalism and traditional economic activities such as fishing and small scale farming This development is counter intuitive Traditional fiscal federalism theory argues that decentralization encourages competition between provinces for investment jobs and growth While Indonesia has undergone one of the world s most far reaching decentralization reforms Malaysia has pursued a consistent centralization campaign at the expense of state governments Thus we would expect the Riau Islands entrepreneurial drive to be unleashed and Johor s to be smothered However Johor s drive for capital is undiminished while the Riau Islands pursuit of investment has dissipated This monograph will explore the reasons for this paradox This book provides a path breaking analysis of how Johor and the Riau Islands have competed with each other for FDI from Singapore in the electronics sector It sheds light on how the institutional and incentive structures facing these regions have encouraged or discouraged policy innovation and dynamism The rigorous analysis of financial and investment data in this book provides a convincing challenge to the conventional wisdom that proximity and cost differentials inevitably lead to closer economic integration Professor Shujiro Urata Waseda University

Global Software Engineering Gamel O. Wiredu, 2019-06-18 Technology and organizations co evolve as is illustrated by the growth of information and communication technology ICT and global software engineering GSE Technology has enabled the development of innovations in GSE The literature on GSE has emphasized the role of the organization at the expense of technology This book explores the role of technology in the evolution of globally distributed software engineering To date the role of the organization has been examined in coordinating GSE activities because of the prevalence of the logic of rationality i e the efficiency ethos mechanical methods and mathematical analysis and indeterminacy i e the effectiveness ethos natural methods and functional analysis This logic neglects the coordination role of ICT However GSE itself is an organizational mode that is technology begotten technology dominated and technology driven as is its coordination GSE is a direct reflection of ICT innovation change and use yet research into the role technology of GSE has been neglected Global Software Engineering Virtualization and Coordination considers existing fragmented explanations and perspectives in GSE research poses new questions about GSE and proposes a framework based on the logic of virtuality i e creativity ethos electrical methods and technological analysis rather than of rationality and indeterminacy Virtuality is the primary perspective in this

book's comprehensive study of GSE. The book concludes with an integrated explanation of GSE coordination made possible through ICT connectivity and capitalization.

Yearbook of International Organizations 2014-2015 (Volume 4) Union of International Associations, 2014-09-17. The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available. Detailed profiles of international non-governmental and intergovernmental organizations (IGO) collected and documented by the Union of International Associations can be found here. In addition to the history, aims, and activities of international organizations with their events, publications, and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved, and extensive statistical data. Providing both an international organizations and research bibliography, Volume 4 cites over 46,000 publications and information resources supplied by international organizations and provides nearly 18,000 research citations under 40 subject headings. This volume also includes a research bibliography on international organizations and transnational associations.

GIS Integrated Teaching for Underachieving Geography Students Soon Singh, Bikar Singh, 2019.

Teaching Sustainability Wendy Petersen Boring, William Forbes, William Forbes (Professor of geography), 2013. American colleges and universities have been relatively quick to address the challenge of sustainability in operations. Ironically, they have been slower to respond in regard to their core mission: educating students. Teaching sustainability aims to redress this shortcoming by opening doors to education for sustainability in the humanities and social sciences. The essays in this collection are richly diverse. They investigate ways sustainability education pushes back against traditional disciplines while it simultaneously benefits from the perspectives and skills these fields have to offer. They also address big questions such as how to make education meaningful, how to examine hidden assumptions underlying current curricula, and how a focus on sustainability can answer critics of contemporary higher education. The heart of teaching sustainability is reflection and advice on pedagogy. From these richly diverse case studies, important common themes emerge: the symbiotic relationship between classroom and campus operations; techniques for transforming the campus itself from merely a setting to a learning laboratory; and the potential of community partners for teaching sense of place. An equally significant theme is the overlap between sustainability education and emerging best practice in pedagogy. Essays on theory and practice, individual and collaborative projects, service learning, and consequential activities all exemplify how sustainability and deep learning go hand in hand. Like sustainability itself, the volume infuses theory with practical application. The contributors demonstrate the ways in which a single course can serve as a powerful change agent for an entire campus, how to build bridges between faculty and administrators, and even how to move forward on modest budgets. The authors themselves constitute a network of advisors.

Publisher's description: **Urbanization and Development**, 2016. The analysis of urban development of the past twenty years presented in this maiden edition of the World Cities Report shows with compelling evidence that there are new forms of collaboration and cooperation, planning, governance, finance, and learning that can sustain positive change. The

Report unequivocally demonstrates that the current urbanization model is unsustainable in many respects It conveys a clear message that the pattern of urbanization needs to change in order to better respond to the challenges of our time to address issues such as inequality climate change informality insecurity and the unsustainable forms of urban expansion **A**
