technologies for assessment and intervention      *Assessment in Practice* Alicia Curtin, Kevin Cahill, Kathy Hall, Dan O'Sullivan, Kamil Özerk, 2019-10-01 *Assessment in Practice* explores timely and important questions in relation to assessment. By examining the relationship between identity, culture, policy and inclusion, the book investigates the conflicted and fractured battleground of assessment and challenges current and practiced understandings of assessment practice. The authors encourage the reader to reconceptualise assessment as a sociocultural practice. Each chapter studies a key theme in the understanding of assessment policy and practice from a sociocultural perspective and provides questions to prompt reflection on the key assessment concepts outlined in the book. Using culture as both a lens and analytic tool, the chapters examine topics such as: The social order of assessment; how assessment works in the world and how learning could be assessed; Perspectives on social justice and assessment with a particular focus on social class and other potential inequalities on the experiences of assessment for young people; Discussions of ability and the assessment of students with special education needs as well as the role of inclusivity in assessment practice. Written by leading academics from University College Cork, the third volume in the successful Routledge Current Debates in Educational Psychology series is an essential read for researchers and postgraduate students in educational research and education psychology.

**Lessons from Estonia's Education Success Story** Peeter Mehisto, Maie Kitsing, 2022-07-19 This book explores how Estonia, despite high levels of poverty, has transformed its education system to become Europe's top performer on PISA (Programme for International Student Assessment). The engaging narrative uncovers reforms, mistakes and lessons learnt that have been harnessed to create a high-performing, high-equity education system which includes social and education policies fostering equity, inclusion, learner autonomy as well as schoolteacher and principal professionalism, autonomy and responsibility. It unearths how easy access to a wide range of data such as perceptions of well-being, autonomy and connectedness, in addition to examination results, builds internal and external accountability and contributes to collective stakeholder efficacy. Grounded in research from Estonia and beyond, this is an ideal read for educators, administrators, academics, university students, change agents and parents interested in school system improvement. As equity, equality and inclusion are core drivers of the Estonian education system, this book would also be of interest to those working in social justice, inclusion and diversity.
