Toxic Inequality Thomas M. Shapiro, 2017-03-14 From a leading authority on race and public policy a deeply researched account of how families rise and fall today Since the Great Recession most Americans standard of living has stagnated or declined Economic inequality is at historic highs But inequality s impact differs by race African Americans net wealth is just a tenth that of white Americans and over recent decades white families have accumulated wealth at three times the rate of black families In our increasingly diverse nation sociologist Thomas M Shapiro argues wealth disparities must be understood in tandem with racial inequities a dangerous combination he terms toxic inequality In *Toxic Inequality* Shapiro reveals how these forces combine to trap families in place Following nearly two hundred families of different races and income levels over a period of twelve years Shapiro s research vividly documents the recession s toll on parents and children the ways families use assets to manage crises and create opportunities and the real reasons some families build wealth while others struggle in poverty The structure of our neighborhoods workplaces and tax code much more than individual choices push some forward and hold others back A lack of assets far more common in families of color can often ruin parents careful plans for themselves and their children Toxic inequality may seem inexorable but it is not inevitable America s growing wealth gap and its yawning racial divide have been forged by history and preserved by policy and only bold race conscious reforms can move us toward a more just society Everyone concerned about the toxic effects of inequality must read this book Robert B Reich This is one of the most thought provoking books I have read on economic inequality in the US William Julius Wilson

Critical Race Spatial Analysis Deb Morrison, Subini Ancy Annamma, Darrell D. Jackson, 2023-07-03 How does space illuminate educational inequity Where and how can spatial analysis be used to disrupt educational inequity Which tools are most appropriate for the spatial analysis of educational equity This book addresses these questions and explores the use of critical spatial analysis to uncover the dimensions of entrenched and systemic racial inequities in educational settings and identify ways to redress them The contributors to this book some of whom are pioneering scholars of critical race spatial analysis theory and methodology demonstrate the application of the theory and tools applied to specific locales and in doing so illustrate how this spatial and temporal lens enriches traditional approaches to research The opening macro theoretical chapter lays the foundation for the book rooting spatial analyses in critical commitments to studying injustice Among the innovative methodological chapters included in this book is the re conceptualization of mapping and space beyond the simple exploration of external spaces to considering internal geographies highlighting how the privileged may differ in socio spatial thinking from oppressed communities and what may be learned from both perspectives data representations that allow the construction of varied narratives based on differences in positionality and historicity of perspectives the application of redlining to the analysis of classroom interactions the use of historical archives to uncover the process of marginalization and the application of techniques such as the fotonovela and GIS to identify how spaces are defined and can be reimagined The

book demonstrates the analytical and communicative power of mapping and its potential for identifying and dismantling racial injustice in education The editors conclude by drawing connections across sections and elucidating the tensions and possibilities for future research Contributors Benjamin Blaisdell, Graham S. Garlick, Leigh Anna Hidalgo, Mark C. Hogrebe, Joshua Radinsky, Daniel G. Solrzano, William F. Tate, Veronica N. Vlez, Federico R. Waitoller

Dying of Whiteness Jonathan M. Metz, 2019-03-05 A physician's provocative Boston Globe and timely Ibram X. Kendi New York Times Book Review account of how right wing backlash policies have deadly consequences even for the white voters they promise to help In election after election conservative white Americans have embraced politicians who pledge to make their lives great again But as physician Jonathan M. Metz shows in *Dying of Whiteness* the policies that result actually place white Americans at ever greater risk of sickness and death Interviewing a range of everyday Americans Metz examines how racial resentment has fueled pro-gun laws in Missouri, resistance to the Affordable Care Act in Tennessee and cuts to schools and social services in Kansas He shows these policies cost increasing deaths by gun suicide, falling life expectancies and rising dropout rates Now updated with a new afterword *Dying of Whiteness* demonstrates how much white America would benefit by emphasizing cooperation rather than chasing false promises of supremacy Winner of the Robert F. Kennedy Book Award [Condition or Process? Researching Race in Education](#) Adrienne D. Dixon, Gloria J. Ladson-Billings, Cecilia E. Suarez, William T. Trent, James D. Anderson, 2021-01-18 The question of why we need to think about how we research race demands a conceptualization of race that captures both its social construction and its temporal evolution We need both an understanding of race and clarity about how we talk about it in our design and conduct of research and in how we interpret and apply it in our findings As a field we can use research on race and racism in education to help construct social change Our purpose with this volume is to underscore the persistence of the discriminatory actions, processes and the normalization of the use of race and class conditions to justify the existing and growing disparity between the quality of life and opportunity for middle class and more affluent Whites and that for people of color and people of color who live in poverty As editors of this volume we wonder what more we could learn and understand about the process and condition of race if we dare to ask bold questions about race and racism and commit to methods and analyses that respect the experiences and knowledges of our research participants and partners

The Test Anya Kamenetz, 2015-01-06 The anti testing movement now has a guidebook Kamenetz shows how fundamentally American it would be to move toward a more holistic system New York Times Book Review *The Test* is an essential and critically acclaimed book for any parent confounded by our national obsession with standardized testing It recounts the shocking history and tempestuous politics of testing and borrows strategies from fields as diverse as games, neuroscience and ancient philosophy to help children cope It presents the stories of families, teachers and schools maneuvering within and beyond the existing educational system, playing and winning the testing game And it points the way toward a hopeful future of better tests and happier kids *Missouri Conservationist*, 2014 [A Study of School-wide](#)

Attendance Rates in Relation to Student Achievement on Missouri Assessment Program Test Scores for Mathematics and ELA in Rural Missouri Middle Schools from 2010 to 2014 Justin Corcoran, Amy Geist, 2016 This study was done to determine if there was a significant relationship between the percentage of overall school wide attendance rates from 2010 to 2014 and overall student achievement on the Missouri Assessment Program MAP in 7th and 8th grade Mathematics and English Language Arts ELA from 2010 to 2014 in Missouri rural middle schools This study specifically analyzed data from 145 rural middle schools in Missouri on the percentages of students scoring in the bottom two levels of the MAP scoring system basic and below basic and the top two levels of the MAP scoring system proficient and advanced to determine if there was a statistically significant relationship between 7th and 8th grade MAP score percentages and school wide attendance rate percentages This study was primarily an attempt to acquire a greater understanding of how school wide attendance impacts student achievement The researchers used EZAnalyze software to perform fourteen Pearson Product Moment Coefficient of correlation tests to determine if any relationships existed between attendance and MAP scores The findings from this study determined there was not a statistically significant relationship between school wide attendance and the bottom two and top two levels of the scoring system for MAP scores in 7th and 8th grade Math and ELA from 2010 to 2014 in Missouri rural middle schools Although this study did not determine a statistically significant relationship between school wide attendance and student achievement the literature included in this study indicates a need for educators to further explore the impact of student attendance on student achievement and school accountability
