emphasizing the significant potential of frugal engineering AFI's are not just aad rather they are engineered to harness frugality with cutting edge research using classical and modern scientific principles Frugal engineering uses advances in science and other knowledge areas including 3D printing biomimetics artificial intelligence Industry 4.0 and others to frugalize pillars of engineering in modern problems This book will be of interest to academics industry professionals policymakers product designers and developers among others It introduces the reader to the wonderful world of frugal engineering In doing so this book shines light on the significant difference that meticulous creation of these innovations through systematic application of science engineering and other knowledge bases can make to the cause of sustainable development Frugal engineering of AFI's is indispensable to achieving the sustainable development goals We can help manage our every growing need for energy and resources effectively by going frugal in the current age of climate change

Radiation Belt Dynamics: Theory, Observation and Modeling Qianli Ma, Xinliang Gao, Dedong Wang, 2024-12-12 The radiation belts of the Earth and other magnetized planets are populated by relativistic particles which are highly dynamic due to various source and loss processes Although the Earth's intrinsic magnetic fields trap charged particles the satellite observations revealed that the outer radiation belt fluxes are strongly affected by solar wind and geomagnetic activities The direct drivers of the radiation belt variability are radial diffusion due to ultra low frequency waves and local wave particle interactions due to whistler mode waves electron cyclotron waves and ion cyclotron waves Quasilinear and nonlinear theories were developed to demonstrate and quantify the importance of each process in the radiation belt dynamics Numerical simulations generally reproduce the overall source and loss of radiation belt particles but detailed quantification of the observed features is challenging Machine learning technique is proved as a useful tool in reproducing and forecasting the particle fluxes in radiation belts *Creativity and Robotics* Patricia Alves-Oliveira, Amy LaViers, Peter H.
