

Which Car Brands Make the Best Vehicles?

We ranked 34 brands based on the Overall Scores of their models, which include road tests, reliability, satisfaction, and safety

February 27, 2024
By Jeff S. Bartlett
Data analysis by Annie Lam

Our annual rankings of 34 automakers can help you find the right vehicle when shopping your car purchase. These rankings are based on the average overall scores, a combination of our road tests, predicted reliability and owner satisfaction data, and safety for all of the models from each automaker.

The top performers this year are the same ones as 2023, with BMW leading the pack, with an 87-point score, followed by Subaru, the leading automaker based on fit. The key for both companies is their consistent contribution of high road test scores and very good predicted reliability. Subaru takes the third position with a score of 85, both thanks to our earlier award as the automaker of the year for its improved reliability.

Keep in mind that even high-scoring brands can have some lower-performing models, so be sure to check the ratings on page 36 for the more specific information. This is especially true for Nissan, which has the Ford and Toyota, which have some models that performed far better than others in our tests.

If the 34 brands CR ranked this year, we're recommending every model tested this year: BMW, Porsche, Honda, Acura, Mazda, and Acura. Simply put, the car buy our road tests from these companies with confidence. (There are other brands that don't have a single model recommended in CR, including Dodge, Mercedes, Alfa Romeo, Volvo, Lincoln, Genesis, Buick, Land Rover, and Jeep. Consider carefully when buying one of these.)

To be included in the brand rankings, CR has to have tested at least two current models from a company. We've tested only one model from Land, Lincoln, and Ram, so they aren't included this year.

How We Rank the Car Brands

- The overall scores for individual models is based on four key factors: the road test, reliability, owner satisfaction, and safety.
- For the road-test scores, we put vehicles through more than 50 tests.
- Predicted reliability ratings are based on problems reported by owners from all possible models across a CR's brand's full lineup.
- Owner satisfaction predictions are based on whether CR members said they would buy the same vehicle again if given the choice.
- Safety is based on assessments of any available crash-test results and extra points assigned to vehicles that come standard with key crash-protection features.
- Green Checkmark: Not every brand's CR model vehicles earned the designation for being in the top 20 percent of vehicles with the chosen attributes, according to the EPA.
