CEPAL Review ,2009 **Macro-Prudential Stress Test Models: A Survey** David Aikman, Daniel Beale, Adam Brinley-Codd, Anne-Caroline Hüser, Giovanni Covi, Caterina Lepore, 2023-08-25 In this paper we survey the rapidly developing literature on macroprudential stress testing models The scope of the survey includes models of contagion between banks models of contagion within the wider financial system including non bank financial institutions such as investment funds and models that emphasise the two way interaction between the financial sector and the real economy Our aim is two fold first to provide a reference guide of the state of the art for those developing such models second to distil insights from this endeavour for policy makers using these models In our view the modelling frontier faces three main challenges a our understanding of the potential for amplification in sectors of the non bank financial system during periods of stress b multi sectoral models of the non bank financial system to analyse the behaviour of the overall demand and supply of liquidity under stress and c stress testing models that incorporate comprehensive two way interactions between the financial system and the real economy Emerging lessons for policy makers are that for a given sized shock hitting the system its eventual impact will depend on a the size of financial institutions capital and liquidity buffers b the liquidation strategies financial institutions adopt when they need to raise cash and c the topology of the financial network
