William M. Leary, 2021-11-21 They were the forgotten commanders of World War II While the names of Bradley and Patton became household words for Americans few could identify Krueger or Eichelberger They served under General Douglas MacArthur a military genius with an enormous ego who dominated publicity from the Southwest Pacific during the American advance from Australia through New Guinea to the Philippines While people at home read about the great victories that were won by MacArthur s navy and MacArthur s air force his subordinates labored in obscurity fearful lest attention from the press lead to their replacement Historians too have paid little attention to the men who fought so well in the far reaches of the Pacific and not a single biography has appeared in the decades since V J Day Yet General Blamey played a key role in the early battles of New Guinea Generals Krueger and Eichelberger led American armies to major victories over the Japanese General Kenney was one of the foremost air strategists of the war while few airmen could match General Whitehead s tactical brilliance Admiral Kinkaid took a crucial part in one of the greatest naval engagements in history Admiral Barbey was an acknowledged master of amphibious warfare *We Shall Return* addresses a serious shortcoming in the literature of World War II Revealed for the first time is the full extent of the contributions made by MacArthur s commanders to the defeat of the Japanese As the authors of these essays so ably demonstrate many of

MacArthur's bold decisions and innovative tactics were urged upon him by his subordinates. Clearly these men deserve more credit for his successes than they have received. *Made Modern* Edward Jones-Imhotep, Tina Adcock, 2018-12-15 Science and technology have shaped not only economic empires and industrial landscapes but also the identities, anxieties, and understandings of people living in modern times. *Made Modern: Science and Technology in Canadian History* draws together leading scholars from a wide range of fields to enrich our understanding of history inside and outside Canada's borders. The book's chapters examine how science and technology have allowed Canadians to imagine and reinvent themselves as modern. Focusing on topics including exploration, scientific rationality, the occult, medical instruments, patents, communication, and infrastructure, the contributors situate Canadian scientific and technological developments within larger national and transnational contexts. The first major collection of its kind in thirty years, *Made Modern* explores the place of science and technology in shaping Canadians' experience of themselves and their place in the modern world. **Resources in Education**, 1982 **Autocar**, 1997 **Motor Cycling and Motoring**, 1988
