Business Studies Scope For 2014 November Paper:

The Routledge Companion to Non-Market Strategy Thomas C. Lawton, Tazeeb S. Rajwani, 2015-04-24 It is commonplace for today's transnational enterprises to undertake political risk analysis when choosing foreign markets and creating entry strategies. Despite this, non-market elements of corporate strategy are less well researched than the traditional market-based perspectives. Providing comprehensive and leading edge overviews of current scholarship, this Companion surveys the current state of the field and provides a basis for improving our understanding of the non-market environment, encouraging new insights to improve strategies for enhancing a firm's performance and legitimacy. With a foreword by David Baron, the international team of contributors includes Jean Philippe Bonardi, Bennet Zelner and Jonathan Doh, who combine to create a book that is essential reading for students and researchers in business management and politics, including those interested in business regulation, environmental policy, political risk and corporate social responsibility.

The Chinese Transnational Developmental State Jennifer Anjali Stapornwongkul, 2026-01-27 This book examines the transformation of the Chinese developmental state (DS) into a transnational DS. Focusing on overseas special economic zones (SEZs), a program that was designed to assist mostly small and medium-sized enterprises (SMEs) to go global, the book assesses how SEZs became part of the Chinese leadership's continued endeavor to foster growth and industrial transformation, feeding naturally into the Belt and Road Initiative (BRI). It goes on to investigate how globalization and integration into the world economy, as well as the narrowing of the developmental gap between China and advanced economies, have forced the DS to adapt its strategy and industrial policies. Revealing how SEZs act as part of the Chinese DS endeavor to steer economic activity, this book will be a valuable resource to students and scholars of Chinese politics and economics.

[International Strategy of Emerging Market Firms](#) Andrei Panibratov, 2017-03-16 Emerging economies are expected to be in the driver's seat of the global economy in the medium and long term. Large multinational corporations will account for much of this activity. In this textbook, Andrei Panibratov explains how emerging market firms accumulate and exploit market knowledge to develop competitive advantages whilst operating globally. Chapters dedicated to the key emerging economies (Brazil, Russia, India, and China) BRIC are enhanced by detailed case studies of large firms' activities. The book is divided into four parts, focusing on the following: An outline of the relevant terminology and the context of the international strategy of emerging market firms, providing an introductory foundation for the whole book; A guide to the evolution of perspectives regarding international strategy, designed to illustrate the changes and trends in the recent academic research on internationalization; A country-by-country illustration of the internationalization of BRIC economies and firms, providing an overall picture of each country's global integration, outward investments and strategies; The concepts and practices behind the strategies employed by different firms. Written by an established international business scholar, this book is essential reading for students of international strategy who wish to understand the importance of the emerging economies.

Sweetman McInnes,2019-08-20 This book investigates the legitimacy of the current Australian Financial Services Licensee Authorised Representative AFSL AR licensing model as specified in the Commonwealth Corporations Act 2001 The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline It takes into account theories in agency legislation legitimacy and the independent individual regulatory regimes in other professions thereafter integrating this framework with the financial planning theory to examine the legitimacy or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees This book makes a very useful reference to understanding financial planning licencing model in Australia
