## **Business Studies Scope For November 2014:**

**Sustainable Investing** Cary Krosinsky, Sophie Purdom, 2016-12-08 A seminal shift has taken place in the world of investing A clear and overarching reality has emerged which must be solved financial considerations must factor in sustainability considerations for ongoing societal success while sustainability issues equally need to be driven by a business case As a result investment practices are evolving especially towards more positive philosophies and frameworks Sustainable Investing brings the reader up to speed on trends playing out in each region and asset class drawing on contributions from leading practitioners across the globe Implications abound for financial professionals and other interested investors as well as corporations seeking to understand future investment trends that will affect their shareholders thinking Policymakers and other stakeholders also need to be aware of what is happening in order to understand how they can be most effective at helping implement and enable the changes arguably now required for economic and financial success Sustainable Investing represents an essential overview of sustainable investment practices that will be a valuable resource for students and scholars of sustainable banking and finance as well as professionals and policymakers with an interest in this fast moving field

*The Law and Economics of Personalization* Adrianus Johannes Van Heusden, 2025-09-01 Imagine every ad every price and even every contract completely tailored to you welcome to the age of AI driven hyper personalization Today vast amounts of consumer data are collected and processed to build individualized profiles with ever increasing precision This enables one to one interactions that evolve in real time and allow firms to influence behavior with unprecedented subtlety Personalized marketing holds the promise of meeting consumer needs more effectively and making digital experiences more relevant and efficient Yet this seemingly customized environment raises urgent concerns about the power of such marketing to exploit cognitive biases reshape preferences and deepen asymmetries in digital markets This book offers the first in depth law and economics analysis of personalized marketing in the digital age It examines how personalized advertising pricing and contracting challenge foundational principles of consumer protection and explores to what extent these practices are regulated under the current EU legal framework The analysis shows that while existing rules provide some safeguards they fall short of addressing the systemic risks posed by hyper personalization To respond to these challenges the book develops a four part policy approach aimed at reinforcing consumer autonomy equity and welfare in data driven markets and bridging the regulatory gaps that personalization opens up Regulating these developments involves a clear trade off between efficiency and fairness How much freedom do you give up in exchange for a hyper personalized experience How confident are you that the price you pay will not exceed what others pay for the exact same service And what does it mean for your autonomy when an algorithm predicts your behavior better than you do yourself This book offers a critical starting point for future regulation and a call to rethink the role of personalization in the digital economy [Israel Internet, E-Commerce Investment and Business Guide - Strategic Information, Regulations, Opportunities](#) IBP.
