Kaufman, 2010 Women and minorities have entered higher paying occupations but their overall earnings still lag behind those of white men Why Looking nationwide at workers across all employment levels and occupations the author examines the unexpected ways that prejudice and workplace discrimination continue to plague the labor market He probes the mechanisms by which race and sex groups are sorted into appropriate jobs showing how the resulting segregation undercuts earnings He also uses an innovative integration of race sex queuing and segmented market theories to show how economic and social contexts shape these processes His analysis reveals how race sex stereotyping and devaluation interact to create earnings disparities shedding new light on a vicious cycle that continues to the leave women and minorities behind

Integration at the Border Karin de Vries, 2013-07-22 A recent development in the immigration policies of several European states is to make the admission of foreign nationals dependent upon criteria relating to their integration As the practice of integration testing abroad becomes more widespread this book endeavours to clarify the legal implications which have hitherto remained poorly understood and studied The book begins by looking at the situation in the Netherlands which was the first EU Member State to introduce pre entry integration requirements It explores the historical and political origins of the Dutch Act on Integration Abroad and explains how in this national context integration has become a criterion for the selection of immigrants It then examines how integration requirements must be evaluated from the point of view of European and international law including human rights treaties EU migration directives and association agreements and the law on non discrimination The book identifies the legal standards set by these instruments with regard to integration testing abroad and draws conclusions as to the lawfulness of the Dutch approach
