**Strategies in online food delivery ecosystems. Characterization and evolution over time** Patrick Armanious, 2021-08-24 Master's Thesis from the year 2020 in the subject Business economics Review of Business Studies grade 1 0 Technical University of Berlin language English abstract The aim of this paper is to complement existing research on dynamic ecosystem strategies in the context of platforms Two research questions will be answered 1 How do competitive strategies of rival platform based ecosystems evolve over time 2 How can competitive strategies of rival platform based ecosystems be characterized A longitudinal multiple case study has been conducted This multiple case study is pursuing an inductive theory building approach as there is limited theoretical foundation on strategies in platform based ecosystems Five online food delivery ecosystems in the German market are analyzed The business ecosystem perspective provides a holistic view on the interdependence across organizations Yet existing literature reveals little theoretical foundation with respect to ecosystem strategies in the context of platforms Prior research includes a static view on ecosystem strategies leading to characterizations such as the component or system strategy Recently a newly presented strategy the bottleneck strategy provides a dynamic view on ecosystem strategies Unfortunately much literature exclusively study cooperation and competition between ecosystem partners however neglects to explain how and why cooperation and competition between rival ecosystems generally occurs
