Universities as Living Labs for Sustainable Development Walter Leal Filho, Amanda Lange Salvia, Rudi W. Pretorius, Luciana Londero Brandli, Evangelos Manolas, Fatima Alves, Ulisses Azeiteiro, Judy Rogers, Chris Shiel, Arminda Do Paco, 2019-04-30 This book fills an important gap in the literature and presents contributions from scientists and researchers

working in the field of sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education. It is widely known that universities are key players in terms of the implementation and further development of sustainability, with some having the potential of acting as living labs in this rapidly growing field. Yet there are virtually no publications that explore the living labs concept as it relates to sustainability and in an integrated manner. The aims of this book, which is an outcome of the 4th World Symposium on Sustainable Development at Universities (WSSD U 2018) held in Malaysia in 2018, are as follows: i) to document the experiences of universities from all around the world in curriculum innovation, research activities, and practical projects as they relate to sustainable development at the university level; ii) to disseminate information, ideas, and experiences acquired in the execution of projects, including successful initiatives and good practice; iii) to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities; and iv) to promote the scalability of existing and future models from universities as living labs for sustainable development. The papers are innovative, cross-cutting, and many reflect practice-based experiences, some of which may be replicable elsewhere. Also, this book, prepared by the Inter University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSDRTC), reinforces the role played by universities as living labs for sustainable development.

Asia is regarded as the fastest growing area for international and domestic tourism in the world today and over the next 20 years. Given the economic, social, and environmental importance of tourism in the region, there is a need for a comprehensive and readable overview of the critical debates and controversies in tourism in the region and the major factors that are affecting tourism development both now and in the foreseeable future. This Handbook provides a contemporary survey of the region and its continued growth and development as a key destination and generator of tourism, which is marked by a high proportion of intra-regional travel. The book is divided into five sections. This first section provides an introduction to the region and context to the nationally focused chapters. The next three sections are then broadly based on the three UNWTO Asian regions: South East Asia, South and Central Asia, and East and

North East Asia providing readers with a valuable snapshot of tourism at various scales and from various approaches and positions The concluding section considers future prospects for tourism in Asia The handbook is interdisciplinary in coverage and is also international in scope through its authorship and content It presents a range of perspectives and understanding of the processes and forces that are shaping tourism in this fascinating and dynamic region that is one of the focal points of global tourism This is essential reading for students researchers and academics interested in tourism in the growth region of Asia now and in the future

The Urban Ecologies of Divided Cities Amira Osman,John Nagle,Sabyasachi Tripathi,2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of

the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers
