marine mammals are just a few of the realistic and elegant origami models you'll be able to fold with this unique book. Origami Animal Sculpture offers a refreshing take on the endlessly fascinating field of animal origami paper folding. In this book, folders will find beautiful photos, clear directions, and streamable or downloadable video that make the creatures in this new collection a joy to fold and display. Author John Szinger has put together expressive, lifelike 3D origami with intermediate to advanced models of unusual animals and related objects. This origami book contains 128 pages of full color, 22 original origami models, step-by-step instructions, colorful diagrams, and photographs. Origami folders will find that the sculptures they create are customized to exhibit the subjects' personality and attitude. Szinger's attention to detail is the hallmark of his work. He's been folding paper for most of his life, starting with paper airplanes at a young age. He devoured origami books at his local library and soon began experimenting with his own designs. Ten years ago, Szinger came back to origami after a long hiatus and began attending conventions where he met other dedicated folders and was inspired to create his own original models. From these encounters, he began folding origami pieces for personal enjoyment and to share with other origami makers. Origami models include Foxy Fox, Brown Bear, Octopus, Giant Squid, Bull, Walrus, Elephant, Seal, Narwhal, Inchworm, Butterfly, and many more.

Fantastic Origami Flying Creatures Hisao Fukui, 2020-07-28. Japanese origami expert Hisao Fukui shows you how to create incredibly realistic paper birds and flying insects, a winged dinosaur, and even an undulating Chinese dragon. The easy-to-follow folding instructions and photos in this book present 24 challenging and amazingly lifelike models from intermediate to complex in terms of their level of difficulty. The 24 unique models in this book include The Swan. The multilayered wings and body give this familiar model a major three-dimensional upgrade. The Crane. Far from traditional, this crane rests on its built-in platform and has an optional open wing configuration that can double as a fancy box. Peacocks. One with tail feathers stowed neatly behind and another with its tail fan proudly displayed. The Swallow. Its distinctive bifurcated tail is on display in a kinetic diving pose. The Crested Kingfisher. The artfully modeled eye of this hunter appears to be on the lookout for its next meal. Stink Bug. There's nothing foul about this instantly recognizable shield-shaped insect model. Beetles. A Horned Beetle with unfurled wings and a Rhinoceros Beetle with an intimidating spiky head. Flying Chinese Dragon. Segmented and supple, this ancient symbol of power and good fortune is poised to pounce. The Dragonfly. This incredibly detailed form is the most challenging model here, but the spectacular results are well worth the effort. And many more.
