

CHAPTER 6 MINI CASE

Assume that you recently graduated and landed a job as a financial planner with Cicero Services, an investment advisory company. Your first client recently inherited some assets and has asked you to evaluate them. The client presently owns a bond portfolio with \$1 million invested in zero-coupon Treasury bonds that mature in 10 years. The client also has \$2 million invested in the stock of Blandy, Inc., a company that produces meat-and-potatoes frozen dinners. Blandy's slogan is "Solid food for shaky times."

Unfortunately, Congress and the President are engaged in an acrimonious dispute over the budget and the debt ceiling. The outcome of the dispute, which will not be resolved until the end of the year, will have a big impact on interest rates one year from now. Your first task is to determine the risk of the client's bond portfolio. After consulting with the economists at your firm, you have specified 5 possible scenarios for the resolution of the dispute at the end of the year. For each scenario, you have estimated the probability of the scenario occurring and the impact on interest rates and bond prices if the scenario occurs. Given this information, you have calculated the rate of return on 10-year zero-coupon Treasury bonds for each scenario. The probabilities and returns are shown farther below.

You have also gathered historical returns for the past 10 years for Blandy, Gourmange Corporation (a producer of gourmet specialty foods), and the stock market.

The risk-free rate is 4% and the market risk premium is 5%.

a. What are investment returns? What is the return on an investment that costs \$1,000 and is sold after 1 year for \$1,060?

Amount invested	\$1,000
Amount received in one year	\$1,060
Dollar return (Profit)	\$60
Rate of return = Profit/Investment =	6%

b. Graph the probability distribution for the 5 scenarios during the next year for the 10-year zero-coupon bonds. What might the graph of the probability distribution look like if there were an infinite number of scenarios (i.e., if it were a continuous distribution and not a discrete distribution)?

Scenario	Probability of Scenario	Return on a 10-Year Zero Coupon Treasury Bond During Next Year
Worst Case	0,10	-14%
Poor Case	0,20	-4%
Most Likely	0,40	6%
Good Case	0,20	16%

Basic Strategy in Context Neil Thomson,Charles Baden-Fuller,2010-06-01 Basic Strategy in Context centres on real world firms and managers by giving each chapter s cases a higher weighting in importance and explanation than is normal Given this emphasis on real world as opposed to theoretical treatment the book enables the solving of practical business problems like those below This emphasis on reality is cemented by the book s treatment of diversity as being the norm highlighted through European business cases from different countries Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry Often theory and cases are treated as different and separated topics we believe

that our integrated didactic treatment is quite unique Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry Here is a sample of specific practical problems to which this book can show solutions Why are resources important and how are they leveraged Using the case of a British failure Railtrack we show the fatal consequences of neglecting existing resources and then in a completely different country and industry Carlo Gavazzi Space in Italy how resources can be utilised from outside the firm to achieve leverage Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment Japan and Carlos Ghosn But can change be planned Sometimes events or luck sabotage the best intentions as shown in the Samsung case The book differentiates itself from the competition in four ways Cases form the highlight of the book Taking European and some international cases as the starting point the objective is to link themes or topics to a description of their effect on the firm The linkage will occur at the relevant point in the case not in a separate section or in another book The author team has used several longitudinal cases spread over a 15 20 year period The longitudinal cases are supported by some new non longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network We feel such an emphasis on cases is a novel feature The theory is explained using a range of modern didactic methods not usually found in competitive offerings Examples include colour coded and highlighted links from the theory to the case questions inside each theory section with model answers and unanswered questions to test the student s grasp of the concepts The book features a mixture of cases from short specific to academically challenging ones Too often superficial cases are placed at the end of chapters in strategy theory books They are picked to emphasize the topics of the preceding chapters The result is spoon feeding with little need or motivation to provoke individual thought or learning The cases in this book are comprehensive approximately 20 pages in length with ample quantitative and qualitative data thus forcing a modicum of effort from the student Shorter cases are also included for ease of understanding and instructor flexibility Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases

Flow Ted Kallman, Andrew Kallman, 2018-01-02 Simple is seldom easy to implement However as a recent Flow trainee puts it Flow plays nice with everyone And it will enable you to successfully customize and implement whatever solution you choose Flow is the distillation of over fifty years of successful hands on experience that has delivered more than 100 million US dollars in value add to companies in Europe the United States and Asia Putting Flow into practice one company increased profit 550 000 in one year on 2 5 million of revenue and a large Asian telecom turned around a mission critical project from a projected 2 year schedule overrun and 300% budget increase to delivering seven months early and 4 million under the original budget in a 90 day period Ted and Andrew Kallman unify Traditional management and Agile methodologies enabling successful results regardless of the existing leadership framework Simple and easy to understand Flow helps individuals teams and organizations create and sustain high performance
