This research is aimed at identifying the topics that should be introduced into the curriculum in anger management. It should be mentioned that this curriculum had to be designed for adult probationers at Legacy Services, in Orange. One can distinguish various topics that should be considered by these learners. At first, these people should learn about the situations that can trigger anger reactions. This knowledge will help them better anticipate anger responses and avoid possible confrontations. Furthermore, these people need to learn about the strategies that help individuals overcome anger. For instance, it is possible to mention deep breathing and relaxation imagery. Apart from that, the probationers need to know about cognitive strategies that are useful for resolving conflicts. In many cases, people decide to have a confrontation, instead of trying to find a solution to the problem. So, people should be able to examine a certain problem from different perspectives. These techniques will be helpful for minimizing the possibility of anger responses. Apart from that, one should focus on such a topic as the expression of anger and dissatisfaction. This information will enable adult probationers to avoid conflicts with other people, especially when they disagree on something. Overall, these people will become more resilient to stress. These are some of the aspects that can be identified.

Additionally, it is important to give the participants a better idea about those emotional characteristics that increase the likelihood of anger responses. So, these people will see how their character traits can impact their behavior. Overall, the selection of these topics is based on the premise that adult probationers should get better insight into the practical aspects of anger management. They should be able to apply the best strategies that have been tested in different settings. In turn, various theoretical models related to anger management will be of little help to these individuals. One should keep in mind that the adult probationers differed considerably in terms of their age, ethnicity and culture. So, educators had to introduce various anger management techniques that could be later adopted by probationers. This is one of the precautions that had to be taken.

Both formative and selective committees participated in the design of curriculum. The main task of these committees was to single out the best practices which adult probationers had to adopt in order to minimize the impact on anger on their experiences

German description Passion und Auferstehung Jesu von Nazaret gehören zu den entscheidenden Grunddaten des christlichen Glaubens. Die ältesten Zeugnisse dafür finden sich bekanntlich im Neuen Testament. Wie bedeutsam sie aber für Christen verschiedenster Richtungen und Prägungen waren, zeigt sich auch darin, dass sie auch später in unterschiedlichsten historischen Kontexten neu erzählt und ausgelegt wurden. Der vorliegende Band bietet beispielhaft Einblick in die wichtigsten Richtungen der Entwicklung von Texten, Motiven, Vorstellungen und Ideen im Zusammenhang mit Passion und Auferstehung Jesu von Nazaret in verschiedenen Gruppen und Richtungen des antiken Christentums. Untersucht werden dabei Auslegungen des Neuen Testaments bei bedeutenden Autoren der Alten Kirche, wichtige apokryphe Texte, aber auch bisher wenig beachtete ikonographische Zeugnisse.

Journal of Behavioral Medicine, 1997. Anger and Aggression. J. R. Averill, 2012-12-06. In recent years a great deal has been written on the topic of aggression; another book on the same topic might seem superfluous at this time. However, the present volume is not just or even primarily about aggression. It is rather a book on anger. Anger and aggression are closely related phenomena, and it is not possible to discuss one without the other. Yet not all anger is aggressive, nor can all aggression be attributed to anger. Therefore, somewhat different considerations apply to each. Even more importantly, the type of theoretical generalizations one can make differs depending upon whether the primary focus is on anger or aggression. The present volume is subtitled an essay on emotion. This indicates that the generalizations to be drawn have more to do with emotional responses (e.g., grief, love, envy, etc.) than with various forms of aggression (e.g., riots, war, crimes of violence, etc.). Stated somewhat differently, anger is here being used as a paradigm case for the study of emotion, not for the study of aggression.
