Chemical Reaction Engineering and Reactor Technology Tapio O. Salmi, Jyri-Pekka Mikkola, Johan P.

Warna, 2011-07-01 The role of the chemical reactor is crucial for the industrial conversion of raw materials into products and numerous factors must be considered when selecting an appropriate and efficient chemical reactor. Chemical Reaction Engineering and Reactor Technology defines the qualitative aspects that affect the selection of an industrial chemical reactor and couples various reactor models to case specific kinetic expressions for chemical processes. Offering a systematic development of the chemical reaction engineering concept, this volume explores essential stoichiometric, kinetic, and thermodynamic terms needed in the analysis of chemical reactors: Homogeneous and heterogeneous reactors, Residence time distributions, and non-ideal flow conditions in industrial reactors. Solutions of algebraic and ordinary differential equation systems, Gas and liquid phase diffusion coefficients and gas film coefficients, Correlations for gas-liquid systems, Solubilities of gases in liquids, Guidelines for laboratory reactors, and the estimation of kinetic parameters. The authors pay special attention to the exact formulations and derivations of mass and energy balances and their numerical solutions. Richly illustrated and containing exercises and solutions covering a number of processes from oil refining to the development of specialty and fine chemicals, the text provides a clear understanding of chemical reactor analysis and design.

American Journal of Pharmacy and the Sciences Supporting Public Health, 1921 Chemoinformatics Johann Gasteiger, Thomas Engel, 2006-12-13 This first work to be devoted entirely to this increasingly important field, the Textbook provides both an in-depth and comprehensive overview of this exciting new area. Edited by Johann Gasteiger and Thomas Engel, the book provides an introduction to the representation of molecular structures and reactions, data types and databases, data sources, search methods, methods for data analysis, as well as such applications as structure elucidation, reaction simulation, synthesis planning, and drug design. A hands-on approach with step-by-step tutorials and detailed descriptions of software tools and Internet resources allows easy access for newcomers, advanced users, and lecturers alike. For a more detailed presentation, users are referred to the Handbook of Chemoinformatics, which will be published separately. Johann Gasteiger is the recipient of the 1991 Gmelin Beilstein Medal of the German Chemical Society for Achievements in Computer Chemistry and the Herman Skolnik Award of the Division of Chemical Information of the American Chemical Society (ACS) in 1997. Thomas Engel joined the research group headed by Johann Gasteiger at the University of Erlangen-Nuremberg and is a specialist in chemoinformatics.
