Elementary Metal Work Charles Godfrey Leland,2015-06-15 Excerpt from *Elementary Metal Work A Practical Manual for Amateurs and for Use in Schools* This work contains an explanation of the processes of cold metal work chiefly as applied to decorative or industrial art and especially with a view to their being taught to children in elementary and preparatory schools The author believes that it may be regarded as thoroughly adapted to this purpose he having been founder and director for four years of the industrial art classes in the public schools of Philadelphia in which some of these branches of metal work were taught with great success so that many of the pupils on leaving school immediately obtained well paid employment As many as six girls at once thus went from the metal class to a factory the proprietor of which declared that all the preliminary education which gave him more trouble than anything else had been perfectly imparted On another occasion a principal in an ornamental metal factory after careful examination of the design and work of the pupils offered to take forty together and guarantee living wages from the beginning and a rapid increase of payment if their parents would consent All that these children knew and much more is set forth clearly and briefly in this work so that no person young or old who wishes to learn metal work either as an art or a trade can with a proper degree of interest and industry fail to do so About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an
