

1. Label the parts of the digestive system. The first one has been done for you.

2. This diagram shows a large food molecule being digested to produce smaller nutrients. Label these nutrients **starch** and **glucose**.

3. Match each organ to its function.

4. Define the following words:

Fiber in your food isn't classified as a nutrient because it is not absorbed into the blood.

However, you **do** need fiber in your diet because it adds bulk to food. This helps

muscles/nerves in the gut to push food along. When the gut struggles to push food fast enough,

this is called **constipation/haemorrhoids**. Eating enough fiber from fruit, **dairy/vegetables** and

wholemeal helps to prevent constipation.
