Education Arts And Morality Path In Psychology:

Heinz Werner and Developmental Science Jaan Valsiner, 2006-11-22 Heinz Werner 1890-1964 was one of the three key developmental psychologists of the 20th century along with Jean Piaget and Lev Vygotsky. This book is a new exploration of Werner's ideas and their social contexts in Vienna in his student years in Hamburg up to 1933 followed by the years of transit as an immigrant to America at times of economic depression finally culminating in his establishment of the prominent Clark tradition in American psychology in the 1950s. The book offers an in-depth analysis of Werner's ideas as they were originally formulated in Vienna and Hamburg and how they were changed by North American influences. Werner's pivotal role between European and American intellectual traditions is illuminated through the use of rich memories of his former students, unique documents from Werner's personal library at Clark, and analyses of links with other European traditions in philosophy and biological sciences. The European period prior to 1933 in Werner's academic life is found to be definitive for Werner's contributions to science. The ideas developed in his early career continued in the form of a productive empirical research program in the 1950s at Clark. An analysis of the social intellectual climate of the development of psychology in America in the 1950s is a special feature of this book that will further enhance an understanding of Werner's unique contribution. This book will be of interest to developmental psychologists, sociologists, and historians of science, philosophers, practitioners working in special education and neuropsychology, and for general readers interested in the history of ideas and life courses of scientists.

The Self-Marginalization of Wilhelm Stekel Jaap Bos, Leendert Groenendijk, 2007-01-05 As both an early disciple of and influence on Freud, Wilhelm Stekel enjoyed a unique position within the analytic movement. More recently he has been notable more for his ostracism from Freud's sphere and little else. *The Self-Marginalization of Wilhelm Stekel* brings a fresh perspective on Stekel, revealing the complex symbiotic bond between mentor and follower in its many social, interpersonal, and psychological forms. In addition to shedding light on a famous outsider, this biography is set in a dual context of the formative years of psychoanalysis and Freud's relationships with his colleagues, comparisons, and contrasts abound with Adler, Jung, and other revered exiles from Freudian circles. At the same time, each chapter defines and identifies a particular aspect of the marginalization process, including self-marginalization, the relationship of marginals to the mainstream, and the value of marginalization in the construction of identity. In all, this book will provide an in-depth look into the social history of psychoanalysis, an informed rethinking of Stekel's contributions as theorist and clinician, a new view of marginalization as differentiated from similar social phenomena, previously unpublished correspondence between Freud and Stekel, a new translation of Stekel's 1926 essay *On the History of the Analytical Movement*. *The Self-Marginalization of Wilhelm Stekel* peels back layers of history to create a singular addition to our knowledge of the origins of psychoanalysis. Psychologists, social scientists, and readers interested in the history of science will find this book an illuminating glimpse into the lives and legacies of the first psychoanalysts.

Building Cultures of Peace Randall Amster, Elavie

Ndura-Ouédraogo,2020-07-13 From violence and abuse within family units to communities and regions torn apart by inter group conflict and wars among nations the human condition is rife with turmoil The consequences of this seemingly perpetual strife weigh heavily on humanity often creating feelings of powerlessness and hopelessness that only serve to breed more conflict and violence In the face of these monumental challenges initiatives for peace struggle to take root Seeking effective ways to encourage these efforts the United Nations adopted three declarations on the eve of the 21st century including the Declaration on a Culture of Peace that broadly defines what the vision looks like and the actions necessary to build cultures of peace Taking up this central challenge of our time this volume of collected essays presents multiple perspectives on the critical issues of peace and conflict resolution that pervade the globe addressing the UN s charge to develop values attitudes modes of behavior and ways of life conducive to the promotion of peace among individuals groups and nations Bringing together scholars and practitioners from fields including education sociology criminology political science and peace studies this work constructively engages the task of creating peace and fostering hope in a conflict ridden world
