

## ENGINEERING GRAPHICS & DESIGN PRACTICAL ASSESSMENT TASK (PAT)

---

### INTRODUCTION

Each learner will attempt a PAT that provides evidence of having achieved the outcomes in this subject. This means that learners will have to design a product using the design process. Learners will consider the social and environmental implications; process information; identify possible problems with the design and find a solution. They will use freehand and Computer-Aided Design (CAD) drawing skills to communicate their ideas. This PAT involves organising and managing the various aspects effectively within the context of a community and not in isolation. The PAT counts 25% towards the year assessment. It is assigned at the start of the academic year and must be submitted during the third term. Each learner must complete the PAT individually and all the presentations must be his/her own work. All the presentation requirements of the PAT have to be completed at school, under the supervision of the EGD teacher. Two PATs are included in this document:

- PAT 1 is a design task in the context of Civil Technology
- PAT 2 is a design task in the context of Mechanical Technology

Each learner must, with the guidance of the teacher, select ONE of the PATs contained in this document.

### Administration of the PAT

The Grade 12 PAT should be completed during the first three terms and handed in during the third term for final formative assessment. The PAT must be completed under controlled conditions. A pace setter for the learners is supplied as Appendices 'E' and 'F' for a 4-term school, however, teachers are expected to draw up a pace setter for the learners at the beginning of the year and attach target dates for the completion of the different stages of the PAT according to the instructions. This needs to be done as not all schools run on the same term system and will enable learners to manage their time more effectively and complete the various stages of the PAT by the due dates.

### Research and Evaluation Requirements

Research on its own does not suffice. Simply downloading many web pages or including random magazine excerpts is not constructive research. Evaluation of all research is critical. **Find ideas, communicate them and then evaluate in your own words, the pros and cons of each. After comparing your ideas indicate which of the ideas you would choose. A comparison is taking various similar items, comparing the pros and cons of the items and then making an informed choice about which one to choose.** Usually, the comparison is between three choices. Only research relevant to the final design should be included in the PAT with evidence of the evaluation and how it is applicable to the final design. All research must be presented on A3 sheets in landscape format.

**David Baud**

**Egd Paper1 Exemplar 2013:**

## Adopting the Tune of Expression: An Emotional Symphony within **Egd Paper1 Exemplar 2013**

In some sort of eaten by displays and the ceaseless chatter of fast transmission, the melodic elegance and emotional symphony produced by the published word frequently disappear into the back ground, eclipsed by the constant noise and disturbances that permeate our lives. Nevertheless, nestled within the pages of **Egd Paper1 Exemplar 2013** a stunning fictional treasure overflowing with natural thoughts, lies an immersive symphony waiting to be embraced. Constructed by a wonderful musician of language, this interesting masterpiece conducts readers on a psychological journey, skillfully unraveling the hidden melodies and profound affect resonating within each carefully crafted phrase. Within the depths of the emotional evaluation, we can discover the book is key harmonies, analyze its enthralling publishing fashion, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
