- Central dogma: Flow of genetic information from DNA to protein
- How the flow of genetic information is regulated?
- Gene- a specific segment of DNA that contains the instructions for making a particular protein
- Not all the genes in an organism's genome is expressed
- Gene expression- production of a functional gene product
- Can be a RNA or a protein

Gene Expression Regulation

- In a cell- Genes can be expressed constitutively
- House keeping genes:- genes that encode for proteins that involved in basic cell functions such as cell cycle control DNA replication
- Other genes:- Expressed only if there is a demand for that gene product

Vidal, 2010-10-13 Post translational modifications serve many different purposes in several cellular processes such as gene expression protein folding and transport to appropriate cell compartment protein lipid and protein protein interactions enzyme regulation signal transduction cell proliferation and differentiation protein stability recycling and degradation Although several hundred different modifications are known the significance of many of them remains unknown The enormous versatility of the modifications which frequently alter the physico chemical properties of the respective proteins represents an extraordinary challenge in understanding their physiological role Since essential cellular functions are regulated by protein modifications an improvement of current understanding of their meaning might allow new avenues to prevent and or alleviate human and animal diseases **Manual of Cardiovascular**

Proteomics Giulio Agnetti, Merry L. Lindsey, D. Brian Foster, 2016-09-15 This book fulfils the need to keep up with the high number of innovations in proteomics and at the same time to warn the readers about the danger of manufacturers and scientists claims around new technologies Mass spectrometry stands as the core technology in proteomics The emerging field of targeted proteomics and its potential applications in the cardiovascular arena are also reviewed and discussed A concluding section highlights the promise of proteomics in the light of these recent developments As this technique and its applications have undergone remarkable advances in the past years recent updates on proteomic applications are covered Another key concept revealed by proteomic technologies is that the extent of protein post translational modifications PTMs as well as their impact on the phenotype has been underestimated by pre proteomics science As such part of the manual focuses on the emerging role of PTMs in basic cardiovascular sciences and in the clinics In fact there is an emerging consensus that the detailed annotation of protein PTMs could lead to a more in depth representation of biological systems translating into more specific targets for therapy as well as biomarkers Moreover a recent trend is so called targeted proteomics The approach was awarded the title of Method of the Year by Nature in 2013 see the editorial by Vivien Marx in 1st issue of Nature in Jan 2013 According to a few proteomic scientists the emphasis should not be placed on generating long
