Beginning Italian continues to evolve to meet the changing needs of instructors and students Professors are offering more
hybrid and online courses technology is providing functionality we could not envision just a few years ago and the types of
students we teach are ever changing Thus in planning the third edition revision it was critical to retain the best parts of our
program while responding to the changes around us The title Avanti conveys the forward thinking approach of this program
which is designed to guide experienced and inexperienced instructors in creating a truly communicative interactive
environment for their students In preparation for this edition we employed a wide array of market research tools to identify a
number of areas for digital innovation As a direct result of our research this new edition offers McGraw Hill's Connect and
LearnSmart with their game changing adaptive and digital learning resources These powerful digital tools now an integral
part of the third edition complement and support the goals of the Avanti program and address the needs of the evolving
Introductory Italian course How does Avanti with Connect and LearnSmart support the needs of Italian instructors and
students Communicative Competence One of the major challenges of any introductory language course is to give students
ample exposure to the language and sufficient opportunity for speaking practice to inspire them to communicate with
confidence Avanti satisfies students desire to communicate in everyday situations right from the start In Connect Italian
students have access 24/7 to the digitally enhanced eBook the interactive textbook activities the online Workbook Laboratory
Manual activities all of the accompanying audio and video resources and the voice tools that allow for out of class practice of
important oral skills Review and Recycling Since introducing and practicing each grammatical structure once in a year long
course is simply not enough to promote acquisition recycling vocabulary and structures for maximum exposure is a key
feature of Avanti Every fourth chapter provides practice of four previously taught grammar points which are then followed by
a related topic With the addition of LearnSmart a super adaptive learning system students can practice key vocabulary and
grammatical structures outside of class This powerful system helps students identify their weaknesses and provides them
with an individualized study program based on their performance Manageable Scope and Sequence Avanti responds to
instructors concerns that most programs attempt to cover too much material in the first year We have designed an
elementary course that reflects reasonable expectations for the amount of material that most beginning learners can acquire
in one year of classroom instruction while providing the necessary practice students need to acquire these structures The

Connect Italian platform includes an assignment builder feature that allows instructors further flexibility to fully customize the course content to meet the needs of their particular students. Instructors may choose to assign all or a subset of the textbook and workbook activities as well as some or all of the grammar points presented in *Per saperne di più* based on their course goals. Cultural Competence: Avanti's meaningful and extensive exploration of Italy's rich and unique culture is fully supported in Connect Italian through audio and video resources and interactive activities. Throughout each chapter, brief readings and interactive culture activities promote an understanding of products, practices, and perspectives. All chapters end with reading, listening, and writing activities that explore cultural topics in depth. Each chapter also includes an analysis of film clips where students can see Italian society and culture in action. Student-centered Classroom: A significant goal of Avanti is to engage the learner inside and outside of the classroom and promote students' personal sense of responsibility to interact with the material and maximize learning. To this end, the inductive presentations of vocabulary and grammar, which encourage language processing and cognitive engagement, can be successfully completed in the classroom or by using the interactive versions in Connect. Administrative Challenges: The Avanti program provides the online tools to reduce the amount of time and energy that instructors have to invest in administering their course. The Assignment Builder allows instructors to easily sort activities according to a variety of parameters that are important to them, including by learning objective, language skill, topic, amount of time on task, or by activity type (multiple choice, fill in the blank, and so on). With Reports, instructors can pull full administrative reports about students' performance, and coordinators will be able to integrate these reports across all sections to see the performance of the entire program. The at-risk student report also allows instructors to quickly identify at-risk students based on numerous criteria who may need additional help to successfully complete the course.
