Avoiding And Enforcing Repetitive Structures In Words:

Avoiding and Enforcing Repetitive Structures in Words Mike Müller,2014-12-15 Avoiding and enforcing repetitions in words are central topics in the area of combinatorics on words with first results going back to the beginning of the 20th century The results presented in this thesis extend and enrich the existing theory concerning the presence and absence of repetitive structures in words In the first part the question whether such structures necessarily appear in infinite words over a finite alphabet is investigated In particular avoidability questions of patterns whose repetitive structure is disguised by the application of a permutation are studied The second part deals with equations on words that enforce a certain repetitive structure involving involutions in their solution set A generalisation of the classical equations $u l v m w n$ that were studied by Lyndon and Schützenberger is analysed The last part considers the influence of the shuffle operation on square free words and related avoidability questions

Hebrew Poetry Nicholas P. Lunn,2006 This study tackles the neglected subject of word order in biblical Hebrew poetry The fact that the order of clause constituents frequently differs from that found in prose has often been noted but no systematic attempt has been offered by way of explanation Here two separate factors are taken into consideration that of purely poetic variation defamiliarisation and that of pragmatic markedness This work offers a new approach to the poetry of the Old Testament that will aid towards more accurate translation exegesis and discourse analysis of poetic texts
