Current Issues in Asian Tourism Chris Cooper, C. Michael Hall, 2020-06-09 This comprehensive volume was put together in response to the growing amount of research on tourism in Asia and an increasing number of authors from Asian countries. It concentrates on two aspects of Asian Tourism: first, the Asian tourists themselves, and second, economic development and tourism in the Asian region. The first part of the collection focuses on three areas: the motivations of different types of Asian tourist, the characteristics and behaviour of particular Asian tourist segments, and finally, an analysis of specific research issues. The second part of the book then goes on to explore the governance and organisation of tourism in the Asian region and the nature of Asian growth and competitiveness as it relates to tourism. The articles in this book were originally published in the journal *Current Issues in Tourism*.

The Routledge Atlas of South Asian Affairs Robert W. Bradnock, 2015-10-14 South Asia has developed from a group of newly independent post-Colonial states of at most secondary importance to the wider world to its current position as a region of central strategic importance to both global economic development and world peace and stability. This Atlas highlights the global significance of South Asia in relation to economic, geopolitical, and strategic interests. It provides a coherent descriptive and analytical account of the key elements of the complex societies that make up the region and its component countries. Illustrated with more than 100 original maps and offering concise entries on key issues, the book is structured thematically in these sections: Global Context, Geographical Environments, Historical Evolution of South Asia, Key Issues in modern South Asia, Economy and Security. Designed for use in teaching undergraduate and graduate classes and seminars in geography, history, economics, anthropology, international relations, political science, and the environment, as well as regional courses on the South Asia, this book is also a comprehensive reference source for libraries and decision makers focusing on South Asia.

China And Its Embrace of Offensive Cyberespionage Kristan Stoddart, 2025-09-22 The West is under challenge from the rise of China as a global power. Cyberespionage has enhanced China's economy, military, and political influence, and it is now a peer rival to the American-led West across land, sea, air, and space. China can conduct cyberespionage on a scale that no other nation can currently match. Its Belt and Road Initiative is a modern-day Silk Route for both overland and maritime trade. Under President Xi Jinping, China is now much closer to parity in conventional forces; should it begin hard power contestation and enter the realm of Thucydides' Trap, a belief that a rising power will challenge a hegemon, Chinese cyberespionage is a real long-term challenge to the United States and the West in general. This book discusses what the implications are and what might still be to come.

Social Studies Education in East Asian Contexts Kerry J. Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices. In an increasingly volatile and unpredictable world, the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority. This task falls to social studies education, which

carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies
